Alfa also has the Spider and Coupe, but they don't have the passion or the driving enjoyment of the GTA.

What Alfa has lacked is a reputation for longevity, although the 147 has proven to be one of the firms more reliable models. Facelifted in 2005 with the new-look Alfa face and a light interior makeover, even in its later years there remains much to like about this stylish hatchback.

I love the fact that the 147 is a rare car and the limited edition Collezione I have is rarer still being 1 of only 500 produced. To balance things out, I have to confess it's a little thirsty but perhaps the fact it encourages enthusiastic driving goes somewhere to explain this.

I purchased my 2003 Alfa Romeo 147 Twinspark.5 speed manual with 140,000 kilometres on the dash. I love the look and styling of the car, it's a real drivers car with comfortable contoured leather seats, a sporty steering wheel and a good suspension set up that handles well on the road. That's where all the compliments end.

Midlife facelifts can be tough things for car manufacturers to carry off, especially when the car in question has already established a reputation as one of the best-looking models in its class. Such a quandary confronted Alfa Romeo when tasked with giving their 147 hatchback range a wash and brush up in 2005.

Alfa Romeo's stylish 147 has been given a new lease of life with a modest facelift and revisions to its sports-biased handling. Although still the same charismatic car as before, its temperament has been tamed slightly and it has gained a new high-power diesel engine. This combination alone makes the car an attractive, if unusual, alternative to a conventional petrol-powered hot hatch.

At the November 2000 launch of the 147, customers could either choose a 1.6-litre manual or a 2.0-litre Selespeed gearboxed model in three-door form with Turismo or Lusso trim. Great car as it was, this choice frustrated the keen driver who wanted the control of a manual gearbox with the added poke of the 150bhp 2.0-litre engine. They didn't have to wait too long. In June of the same year Alfa ...

The manual car is still the most popular option for keen drivers and the rest of the 147's chassis is well up to par with the slick gearbox. The Ford Focus and the Peugeot 307 are probably as good as the 147 over a twisty road course, but neither gives you that buzz when your garage door whirrs up.

After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.
