variables by examining the interaction between those variables and bilingual children's language skills; and (3) provide intervention in both languages, thus supporting development of the child's 2 languages.

Clinical Implications of Research on Language Development ...
Speech-language pathologists (SLPs) are treating an increasing number of bilingual clients, including those diagnosed with autism spectrum disorders (ASDs). There is not a clear consensus among professionals regarding which language should be used in intervention when treating bilingual children with ASD.
