BMW, that most performance-oriented of car companies, had no affordable sports roadster in its line-up before 1995. Stung into action by Mazda's revival of the classic two-seater roadster, the Germany company quickly staked its claim with the Z3, a classic long-nose, short-tail design that used existing BMW

mechanical hardware to good effect. This new book tells the story of BMW's Z3 and Z4 two-seater roadsters and coupes, which since 1995 have been at the forefront of the affordable sports car market. The history of the Z3 and both generations of Z4 are covered as well as full specifications of all models; the formidable M Power derivatives and a guide to buying and owning. The book is profusely illustrated with over 200 colour photographs and diagrams. Contents include: Historical background to BMW's arrival in the two-seater sports car market; Complete history of the Z3 and both generations of Z4; Full specifications of all models; The formidable M Power derivatives; Guide to buying and owning.

Writer and critic Vivian Gornick's long-unavailable classic exploring how Left politics gave depth and meaning to American life "Before I knew that I was Jewish or a girl I knew that I was a member of the working class." So begins Vivian Gornick's exploration of how the world of socialists, communists, and progressives in the 1940s and 1950s created a rich, diverse world where ordinary men and women felt their lives connected to a larger human project. Now back in print after its initial publication in 1977 and with a new introduction by the author, The Romance of American Communism is a landmark work of new journalism, profiling American Communist Party members and fellow travelers as they joined the Party, lived within its orbit, and left in disillusionment and disappointment as Stalin's crimes became public.
