Military units and SWAT teams that specialize in Close Quarters Battle (CQB) typically bring a large force to the fight and often have numerous supporting assets such as snipers, helicopters and tactical vehicles. Thus, the scenario of a single Soldier or SWAT officer having to operate alone is also relatively unlikely and often receives less attention. However, for ordinary citizens in a home-defense scenario or for police officers responding to an emergency call, the chances of having to operate alone are quite likely. In these types of situations, backup is frequently unavailable or will not arrive in time. The citizens and officers who are forced to operate on their own face potentially the greatest risk, yet there are almost no tactical references (books, videos or classes) that provide useful information on the subject of single-person tactics. This manual and the associated training courses were developed by a team of experts with extensive special operations and law-enforcement experience to help fill the dangerous capability and knowledge gap in the area of single-person tactics. This manual can provide citizens and officers with critical, life-saving tactical knowledge that will give them a marked advantage

organizations, police leaders, and individual officers and trainers, in the US and globally. It also has potential as recommended reading in policing courses at the community college and university level.

Compared to those of his contemporaries W.E. Fairbairn and E.A. Sykes, Leonard Hector Grant-Taylor's impressive achievements in the development of close-quarters battle (CQB) skills have gone mostly undocumented. The Palestine Police Force Close Quarter Battle, more commonly known as The Palestine Police Force Manual, is a compilation of lessons taught by Grant-Taylor at the Middle East School of Small Arms in the early 1940s to members of the Palestine Police Force and other units in the Middle East. Only a small number of copies were ever created for internal use, and just a handful have survived. Working closely with Phil Mathews, an English researcher of World War II combative techniques, Paladin Press brings this rare manual into print once again. It is a gold mine of realistic CQB instruction from SOE veteran Grant-Taylor, including his techniques for controlling fear, reacting properly to surprise and other aspects of developing a survival mind-set; lessons in unsighted "point shooting" that both predate and were later influenced by Fairbairn and Sykes; firing a pistol with either hand or with both hands to effectively double one's firepower; and a host of other physical and mental skills to maximize one's chances of coming out alive in an armed encounter. In an exclusive foreword for this reprint edition, Mathews discusses Grant-Taylor's legacy in the history of CQB instruction and explores his relationship with Fairbairn and Sykes. A fascinating addition to Paladin's historic library.
