Catastrophic Care is the eye-opening result. Goldhill explicates a health-care system that now costs nearly \$2.5 trillion annually, bars many from treatment, provides inconsistent quality of care, offers negligible customer service, and in which an estimated 200,000 Americans die each year from errors.

*Catastrophic Care: How American Health Care Killed My ...*

His plan has three components: mandatory cradle-to-grave catastrophic health insurance with low premiums and a very high deductible; health savings accounts to which individuals would be required to contribute payments based on their age; and health loans, which would enable individuals to borrow against future contributions to their health savings accounts in the event of a costly but not catastrophic illness or accident.

*'Catastrophic Care' In America's Health System : NPR*

About *Catastrophic Care*. In 2007 David Goldhill's father died from infections acquired in a well-regarded New York hospital. The bill, for several hundred thousand dollars, was paid by Medicare. Angered, Goldhill became determined to understand how it was possible that well-trained personnel equipped with world-class technologies could be responsible for such inexcusable carelessness—and how a business that failed so miserably could still be rewarded with full payment.

*Catastrophic Care by David Goldhill: 9780345802736 ...*

*Catastrophic Care* is the eye-opening result. Blending personal anecdotes and extensive research, Goldhill presents us with cogent, biting analysis that challenges the basic preconceptions that have shaped our thinking for decades.

An investigation into America's failing health-care industry shares the story of the author's tragic experience of losing his father to hospital-acquired infections, arguing against the expansion of insurance coverage while recommending a comprehensive, patient-empowering approach that renders health care transparent, affordable and effective.

"A visionary investigation that will change the way we think about health care- how and why it is failing, why expanding coverage will actually make things worse, and how our health care can be transformed into a transparent, affordable, successful system. n 2007, David Goldhill's father died from infections acquired in a hospital, one of more than two hundred thousand avoidable deaths per year caused by medical error. The bill was enormous and Medicare paid it. These circumstances left Goldhill angry and determined to understand how world-class technology and personnel could coexist with such carelessness and how a business that failed so miserably could be paid in full. *Catastrophic Care* is the eye-opening result. Blending personal anecdotes and extensive research, Goldhill presents us with cogent, biting analysis that challenges the basic preconceptions that have shaped our thinking for decades. Contrasting the Island of health care with the Mainland of our economy, he demonstrates that high costs, excess medicine, terrible service, and medical error are the inevitable consequences of our insurance-based system. He explains why policy efforts to fix these problems have

Explains how employers can take control of the increasing burden of health care costs, using the approach taken by Serigraph, a company that focused on consumer responsibility, primary care, and centers of value, as a model for improving health care while lowering the cost.

*America's Health Care Crisis Solved* highlights the major pitfalls of our current health care system and shows why, without changes, health care costs will soon demolish the American economy as well as the opportunity to receive quality care. However, contrary to the increasingly popular idea of a government health plan, the alternative presented by authors J. Patrick Rooney and Dan Perrin brings the self-interest of you, the American consumer, into the equation.

A Vintage Shorts Original Selection Despite all attempts to make it otherwise, the American health care system remains arcane, bloated, inefficient, and damaging to our health. We pay high premiums, endure exorbitant out-of-pocket costs, see little to no information about treatment options, and suffer often meager and sloppy care. The Affordable Care Act was an unambitious reform not likely to have an impact on these fundamental problems. But, politics aside, health care doesn't have to be this complicated. And, its costs don't have to be this high. In this provocative and convincing essay, David Goldhill outlines the myriad misconceptions that plague American health care, and makes a radical case for reform. There is no panacea, but if we want to preserve our health and our pocketbooks, we need to normalize health care and enable a competitive, dynamic and diverse exchange where providers will be held accountable to the Americans they care for. An ebook short.

Our market-based, profit-driven health care system in the United States has put necessary care increasingly beyond the reach of ordinary Americans. Primary health care, the fundamental foundation of all high-performing health care systems in the world, is a critical but ignored casualty of the current system. Unfortunately, primary care is often poorly understood, even within the health professions. This book describes what has become a crisis in primary care, defines its central role, analyzes the reasons for its decline, and assesses its impacts on patients and families. A constructive approach is presented to rebuild and transform U.S. primary care with the urgent goal to address the nation's problems of access, cost, quality and equity of health care for all Americans.

A renowned authority from Harvard Business School confronts America's health care crisis-and how consumer control can fix it PRAISE FOR

WHO KILLED HEALTHCARE? “A brilliant analysis... A must-read.” – Bill George, Professor, Harvard Business School and Former CEO of Medtronic “As it becomes more and more obvious to everyone that our current health care system is unsustainable, this is the book that had to be written.” – Daniel H. Johnson, Jr. MD, former president of the American Medical Association “Regina Herzlinger’s ideas to tackle the crisis of the U.S. health care system are based on keen knowledge of the system’s existing difficulties along with insights that introduce the reader to new streamlined choices that have the potential of getting both quantity and cost under control.” – Joseph Kennedy, founder, chairman, and president, Citizens Energy Corporation, CEO, Citizens Health Care, former representative (D-Mass) “Regina Herzlinger... offers a vision of the way things can be, should be, and will be sooner or later. The only question is: how long do we have to wait?” – Greg Scandlen, founder, Consumers for Health Choices “Regi Herzlinger has brilliantly articulated a better way – embracing the principles of competition and innovation that cause every other sector of our economy to thrive. Discharging American health care from the ICU can only happen by putting individual Americans – not politicians and bureaucrats – back in charge of their health care decisions.” – U.S. Senator Tom Coburn (R-Okla), M.D. “Following on the heels of her landmark Market-Driven Health Care, Herzlinger lays it on the line with her expose of what many who work in the health care industry have felt in their gut. Now it is articulated in an entertaining and must-read portrayal, with you and me as the only way out.” – Dennis White, executive vice president for strategic development, National Business Coalition on Health “A wonderful Orwellian romp through issues which carry a deadly irony. The killers of health care are, of course, the third parties, each of which has an itchy palm and a commitment to profit or power which exceeds the commitment to service, with each engaging the others within a politically shaped box. Rarely has the case for the public been made with so much force, foresight, and wit, and a better way forward shown so clearly.” – James F. Fries, MD, Professor of Medicine, Stanford University School of Medicine “You can practically hear the war chants as Professor Herzlinger sets out her view of what’s wrong with the health care system and how to fix it. You’d best read it so you can decide which side you will be on when the battle is joined.” – Paul Levy, CEO, Beth Israel Hospital, Boston, MA “Regina Herzlinger, the nation’s leading expert on consumer-driven health care, has given us a brilliant analysis of the flaws in our health care system and what it will take to get it back on track. Her latest book is a must-read.” – Bill George, Professor of Management Practice, Harvard Business School, Former CEO, Medtronic, and author of Authentic Leadership “You don’t have to agree with her diagnosis and prescription for the U.S. health care system, but you do have to read her book. Once again, Professor Herzlinger has put together a well researched, well written, and very provocative blueprint for the future of health care.” Peter L. Slavin, MD, President, Massachusetts General Hospital

"A graphic explanation of the PPACA act"--Provided by publisher.

The preeminent doctor and bioethicist Ezekiel Emanuel is repeatedly asked one question: Which country has the best healthcare? He set off to find an answer. The US spends more than any other nation, nearly \$4 trillion, on healthcare. Yet, for all that expense, the US is not ranked #1 -- not even close. In *Which Country Has the World's Best Healthcare?* Ezekiel Emanuel profiles eleven of the world's healthcare systems in pursuit of the best or at least where excellence can be found. Using a unique comparative structure, the book allows healthcare professionals, patients, and policymakers alike to know which systems perform well, and why, and which face endemic problems. From Taiwan to Germany, Australia to Switzerland, the most inventive healthcare providers tackle a global set of challenges -- in pursuit of the best healthcare in the world.
