in the yard single heads per cylinder the oil line is one per head did you pull the valve cover and see if the rocker shaft is getting oil those old engines like d13000s and others build up debris in the rocker shaft behind the

Caterpillar D17000 Engine Parts Manual [EPUB]

We recently reassembled one of the CAT D-17000 engines on our 44 ton GE diesel locomotive. After setting the valves cold and starting the engine, we noticed a knock coming from one of the heads. After surmising that it was caused by excessive valve clearance, we warmed the engine up and set the valves hot.

Named the Caterpillar D17000, the engine powered all different types of machines in the rail, oil, and marine industries. In 1936 the Caterpillar diesel engine hit a major milestone when the 17,000th unit rolled off the assembly line at the East Peoria plant. How ironic that the engine just happened to be a D17000.

Caterpillar Tractor - Gas Engines - Gas Engine Magazine

But starting in 1938, boat owners could buy Caterpillar engines specifically designed for use on the water. In 1938 three new models were added to the Caterpillar diesel engine line. They were the D11000, the D13000, and the D17000. The first two were six-cylinder models, while the D17000 was a V8. All were 900 RPM models.
