One of the most remarkable thinkers of this century, Arnold Toynbee won world-wide recognition as the author of the monumental ten-volume *A Study of History*. Its publication and phenomenal success brought him fame and the highest praise, as the reading public proclaimed him the most renowned scholar in the world. This thought-provoking, engaging study of Toynbee, written by one of today's most eminent historians, weaves together Toynbee's intellectual accomplishments and the personal difficulties of his private life. Providing both an intimate portrait of a leading thinker and a judicious evaluation of his work and his legacy for the study of history, William H. McNeill offers both a biography and a commentary on how to write and understand

history. Along with an illuminating discussion of the strengths and weaknesses of A Study of History and the countless other works written by Toynbee, McNeill offers a compelling examination of the responses of other historians (including the devastating attack launched by Hugh Trevor-Roper) and Toynbee's attempts to modify his Study to answer these criticisms. McNeill also explores his tormented personal life, including his troubled marriage to Rosalind Murray and the suicide of his son, Anthony. In this sympathetic depiction of a life, both triumphant and tragic, McNeill brings his skills to bear on one of the greatest figures in his field, illuminating a career of rare accomplishment.

Six years after the rendering of the Nuremberg Judgment

world conditions are not such as to encourage a study on what constituted its principal innovation in the legal field: the punishment of the authors of aggressive war. The war alliance against the Axis Powers which was the political basis of the Nuremberg Trial and of the United Nations Organisation has broken up. Mutual fear, threats and accusations and a gigantic armament race are the dominating factors in international life during the cold war period, and the minds of statesmen, military men and lawyers alike are more preoccupied with the problem of how to win a possible third world war than with that of preventing its occurrence and avoiding responsibility for its outbreak. While the survival of their freedom and civilization is at stake, the nations seem more intent on preparing for what is vaguely and equivocally

called 'self-defence' than on accepting and assuring the reign of law. The strain of the protracted struggle in Korea, moreover, seems to turn the first experiment with military sanctions against an aggressor into a classic game of power politics. It is not surprising that in such circumstances little energy is displayed in efforts to implement the principles to which the United Nations pledged themselves in Nuremberg, and that many statesmen and lawyers seem prepared to abandon, at least for the near future, the precedent of the time of alliance, expression of confidence in the victory of law over force.

they had to wonder whether their crops would grow to maturity without being stolen or their children sold into slavery by a victorious foe....They forget that in time of danger, in the face of the enemy, they must trust and confide in each other, or perish....They forget, in short, that there has ever been a category of human experience called the enemy. "That, before 9/11, was what had happened to us. The very concept of the enemy had been banished from our moral and political vocabulary. An enemy was just a friend we hadn't done enough for yet. Or perhaps there had been a misunderstanding, or an oversight on our part -- something that we could correct.... "Our first task is therefore to try to grasp what the concept of the enemy really means. The enemy is someone who is willing to die in order to kill you.

And while it is true that the enemy always hates us for a reason, it is his reason, and not ours." So begins *Civilization and Its Enemies*, an extraordinary tour de force by America's "reigning philosopher of 9/11," Lee Harris. What Francis Fukuyama did for the end of the Cold War, Lee Harris has now done for the next great conflict: the war between the civilized world and the international terrorists who wish to destroy it. Each major turning point in our history has produced one great thinker who has been able to step back from petty disagreements and see the bigger picture -- and Lee Harris has emerged as that man for our time. He is the one who has helped make sense of the terrorists' fantasies and who forces us most strongly to confront the fact that our enemy -- for the first time in centuries -- refuses to play by

any of our rules, or to think in any of our categories. We are all naturally reluctant to face a true enemy. Most of us cannot give up the myth that tolerance is the greatest of virtues and that we can somehow convert the enemy to our beliefs. Yet, as Harris's brilliant tour through the stages of civilization demonstrates, from Sparta to the French Revolution to the present, civilization depends upon brute force, properly wielded by a sovereign. Today, only America can play the role of sovereign on the world stage, by the use of force when necessary. Lee Harris's articles have been hailed by thinkers from across the spectrum. His message is an enduring one that will change the way readers think -- about the war with Iraq, about terrorism, and about our future.
