In other words, corrective actions take steps to fix the cause of a problem after the problem has occurred, whereas preventive actions notice the problem before it occurs and takes steps to fix the cause of the problem before it happens.

~~Corrective Action vs. Preventive Action: A complete guide~~

Corrective and preventive action (CAPA or simply corrective action) consists of improvements to an organization's processes taken to eliminate causes of non-conformities or other undesirable situations. It is usually a set of actions that laws or regulations require an organization to take in manufacturing, documentation, procedures, or systems to rectify and eliminate recurring non-conformance.

~~Corrective and preventive action~~ - Wikipedia

address the requirements of the quality system regulation have been... 2. Determine if appropriate sources of product and quality problems have been identified. Confirm that data from these... 3. Determine if ...

~~Corrective and Preventive Actions (CAPA) | FDA~~

In simple terms, corrective action prevents recurrence, while preventive action prevents occurrence. Corrective action is carried out after a nonconformity has already occurred, whereas preventive action is planned with the goal of preventing a nonconformity in its entirety. Corrective vs Preventive Example

~~What is Corrective Action vs Preventive Action ...~~

Corrective action is the action taken to eliminate the cause of nonconformities. Preventive action is the action taken to eliminate the cause of potential nonconformities. Corrective actions are intended to correct and also prevent recurrence of not only nonconforming product but also poor practices (inadequate training, for example).

~~Corrective and Preventive Actions (CAPA) — QualityMedDev~~

Corrective action: Action to eliminate the cause of a nonconformity and to prevent recurrence; Preventive action: Action to eliminate the cause of a potential nonconformity or other potential undesirable situation; In short, preventive action prevents occurrence and corrective action prevents recurrence, while correction basically refers to containment. If these terms still seem fuzzy, consider the difference between putting out a fire versus eliminating the hazards likely to cause one.

~~Corrective Action vs. Preventive Action: Knowing When to ...~~

Corrective actions are a set of plans taken to identify root causes of a problem and find solutions for the consequences. Preventive actions are a set of actions taken to identify potential risks that could affect operations and creation of plans to mitigate them. Point of use. Preventive actions are taken before problems arise as a means of avoiding them.

~~Difference Between Corrective Action and Preventive Action ...~~

A corrective action is issued to simply rectify or correct a problem or defect which has been identified or found i.e an existing non conformity. A preventive action seeks to prevent a problem or non conformance issue which may not have created a defect (yet), but which has the potential to cause a problem later.

~~Corrective and preventive action example: Usable examples~~

Corrective Action Preventive Action (CAPA) is a process which investigates and solves problems, identifies causes, takes corrective action and prevents recurrence of the root causes. The ultimate purpose of CAPA is to assure the problem can never be experienced again. CAPA can be applied in many disciplines. A few of these disciplines are:
