This handbook provides a comprehensive view of the field of the sociology of gender. It presents the most important theories about gender and methods used to study gender, as well as extensive coverage of the latest research on gender in the most important areas of social life, including gendered bodies, sexuality, carework, paid labor, social movements, incarceration, migration, gendered violence, and others. Building from previous publications this handbook includes a vast array of chapters from leading researchers in the sociological study of gender. It synthesizes the diverse field of gender scholarship into a cohesive theoretical framework, gender structure theory, in order to position the specific contributions of each author/chapter as part of a complex and multidimensional gender structure. Through this organization of the handbook, readers do not only gain tremendous insight from each chapter, but they also attain a broader understanding of the way multiple gendered processes are interrelated and mutually constitutive. While the specific focus of the handbook is on gender, the chapters included in the volume also give significant attention to the interrelation of race, class, and other systems of stratification as they intersect and implicate gendered processes.

This is the first critical study of feminist practices of " speaking out " in response to rape. This book argues that feminist anti-rape politics are characterised by a belief in the transformative potential of women ' s personal narratives of sexual violence. The political mobilisation of these narratives has been an incredibly successful strategy, but one with unresolved ethical questions and political limitations. The book explores both the successes and the unresolved questions through feminist archival materials, published narratives of sexual violence, and mass media and internet sources. It argues that that a rethinking of the role and place of women ' s stories and the politics of speaking out is vital for a rethinking of feminist politics around sexual violence and key to fresh approaches to combating this violence.

The present volume is an exciting new collection of original essays by outstanding feminist theorists including Sally Haslanger, Marilyn Frye and Linda Alcoff. Feminist Metaphysics is the first collection of articles addressing metaphysical issues from a feminist perspective. The essays cover central feminist topics including: the ontology of sex and gender, persons, identity and subjectivity, and the relations among experience, ideology and reality. Many of the papers combine cutting-edge feminist theory with contemporary metaphysics and the philosophy of language. The volume is also distinctive in including articles representing both analytic and continental perspectives on metaphysics. The essays are philosophically sophisticated and are primarily intended for a professional audience of philosophers and feminist theorists.

From " black girl magic " to Black Lives Matter, the second decade of the 21st century is defined by black feminist politics. Black Feminist Politics from Kennedy to Trump is a definitive investigation of the mainstreaming of black feminist politics in the 21st century. Following on the success of Black Feminist Politics from Kennedy to Clinton and Black Feminist Politics from Kennedy to Obama, this volume incorporates the black women leaders of Black Lives Matter; contemporary black feminist political stars like Rep. Maxine Waters and Senator Kamala Harris; and the transformative influence of black feminist political strategy and principles in mainstream U.S. politics, especially in the 2016 U.S. election. The text also deepens earlier editions ' consideration of sexuality and gender identity in black feminist politics and explores the role of digital organizing and social media in setting the terms of contemporary political struggles. A must-read for scholars in Political Science, American Studies, Africana Studies, History, and Gender/Feminist/Women ' s Studies, Black Feminist Politics from Kennedy to Trump also breaks down the complexity of contemporary politics for an everyday reader eager to understand how black women have been defining leadership and politics since the mid-century.

The development of the era known as the 'second wave' of US feminist protest.

This open access book seeks to understand how politics is being made in a pluralistic sense, and explores how these political struggles are challenging and transforming gender, sexuality, and colonial norms. As researchers located in Sweden, a nation often cited as one of the most gender-equal and LGBTQ+tolerant nations, the contributions investigate political processes, decolonial struggles, and events beyond, nearby, and in between organizations, states, and national territories. The collection represents a variety of disciplines, and different theoretical conceptualizations of politics, feminist theory, and postcolonial and queer studies. Students and researchers with an interest of queer studies, gender studies, critical whiteness studies, and civil society studies will find this book an invaluable resource.

Degradation, dehumanization, instrumentalization, humiliation, and nonrecognition — these concepts point to ways in which we understand human beings to be violated in their dignity. Violations of human dignity are brought about by concrete practices and conditions; some commonly acknowledged, such as torture and rape, and others more contested, such as poverty and exclusion. This volume collates reflections on such concepts and a range of practices, deepening our understanding of human dignity and its violation, bringing to the surface interrelationships and commonalities, and pointing to the values that are thereby shown to be in danger. In presenting a streamlined discussion from a negative perspective, complemented by conclusions for a positive account of human dignity, the book is at once a contribution to the body of literature on what dignity is and how it should be protected as well as constituting an alternative, fresh and focused perspective relevant to this significant recurring debate. As the concept of human dignity itself crosses disciplinary boundaries, this is mirrored in the unique range of perspectives brought by the book ' s European and American contributors — in philosophy and ethics, law, human rights, literature, cultural studies and interdisciplinary research. This volume will be of interest to social and moral philosophers, legal and human rights theorists, practitioners and students.

This volume informs the growing number of educational policy scholars on the use of critical theoretical frameworks in their analyses. It offers insights on which theories are appropriate within the area of critical educational policy research and how theory and method interact and are applied in critical policy analyses. Highlighting how different critical theoretical frameworks are used in educational policy research to reshape and redefine the way scholars approach the field, the volume offers work by emerging and senior scholars in the field of educational policy who apply critical frameworks to their research. The chapters examine a wide range of current educational policy topics through different critical theoretical lenses, including critical race theory, critical discourse analysis, postmodernism, feminist poststructuralism, critical theories related to LGBTQ+ issues, and advocacy approaches.

This book is published open access under a CC BY 4.0 license. This open access book provides an overview of childlessness throughout Europe. It offers a collection of papers written by leading demographers and sociologists that examine contexts, causes, and consequences of childlessness in countries throughout the region.The book features data from all over Europe. It specifically highlights patterns of childlessness in Germany, France, the United Kingdom, Finland, Sweden, Austria and Switzerland. An additional chapter on childlessness in the United States puts the European experience in perspective. The book offers readers such insights as the determinants of lifelong childlessness, whether governments can and should counteract increasing childlessness, how the phenomenon differs across social strata and the role economic uncertainties play. In addition, the book also examines life course dynamics and biographical patterns, assisted reproduction as well as the consequences of childlessness. Childlessness has been increasing rapidly in most European countries in recent decades. This book offers readers expert analysis into this issue from leading experts in the field of family behavior. From causes to consequences, it explores the many facets of childlessness throughout Europe to present a comprehensive portrait of this important demographic and sociological trend.
