how one of the biggest private companies in the world grew to be that big to tell the story of modern corporate America. The annual revenue of Koch Industries is bigger than that of Goldman Sachs, Facebook, and US Steel combined. Koch is everywhere: from the fertilizers that make our food to the chemicals that make our pipes to the synthetics that make our carpets and diapers to the Wall Street trading in all these commodities. But few people know much about Koch Industries and that's because the billionaire Koch brothers have wanted it that way. For five decades, CEO Charles Koch has

kept Koch Industries quietly operating in deepest secrecy, with a view toward very, very long-term profits. He's a genius businessman: patient with earnings, able to learn from his mistakes, determined that his employees develop a reverence for free-market ruthlessness, and a master disrupter. These strategies made him and his brother David together richer than Bill Gates. But there's another side to this story. If you want to understand how we killed the unions in this country, how we widened the income divide, stalled progress on climate change, and how our corporations bought the influence

industry, all you have to do is read this book. Seven years in the making, Kochland “is a dazzling feat of investigative reporting and epic narrative writing, a tour de force that takes the reader deep inside the rise of a vastly powerful family corporation that has come to influence American workers, markets, elections, and the very ideas debated in our public square. Leonard’s work is fair and meticulous, even as it reveals the Kochs as industrial Citizens Kane of our time” (Steve Coll, Pulitzer Prize-winning author of Private Empire).

Founder of The Boston Beer Company, brewer of Samuel Adams Boston Lager, and a key catalyst of the American craft beer revolution, Jim Koch offers his unique perspective when it comes to business, beer, and turning your passion into a successful company or career. In 1984, it looked like an unwinnable David and Goliath struggle: one guy against the mammoth American beer industry. When others scoffed at Jim Koch's plan to leave his consulting job and start a brewery that would challenge American palates, he chose a nineteenth-century family recipe and launched Samuel Adams. Now one of America's leading

craft breweries, Samuel Adams has redefined the way Americans think about beer and helped spur a craft beer revolution. In *Quench Your Own Thirst*, Koch offers unprecedented insights into the whirlwind ride from scrappy start-up to thriving public company. His innovative business model and refreshingly frank stories offer counterintuitive lessons that you can apply to business and to life. Koch covers everything from finding your own Yoda to his theory on how a piece of string can teach you the most important lesson you'll ever learn about business. He also has surprising advice on sales, marketing,

are more important today than ever before. What exactly does Koch Industries, Inc., do and why is it so remarkably profitable? Koch's name may not be on your home's plywood, vehicle's grille, smartphone's connectors, or baby's ultra-absorbent diapers but it makes them all. And Koch's Market-Based Management® (MBM) system is what drives these innovations and many more. The core objective of MBM is to generate good profit. Good profit results from products and services that customers vote for freely with their dollars. It results from a bottom-up culture where employees are empowered to act

entrepreneurially to discover customers' preferences and the best ways to improve their lives. Drawing on six decades of interdisciplinary studies, experimental discovery, and practical implementation across Koch businesses worldwide, Charles Koch walks the reader through the five dimensions of MBM to show how to apply its framework in any business, industry, or organization of any size. Readers will learn how to:

- Craft a vision for how to thrive in spite of increasingly rapid disruption and ever-changing consumer values
- Select and retain a workforce possessing both virtue and

A surprising take on how you can help tackle the really big problems in society—from one of America's most successful entrepreneurs. People are looking for a better way. Towering barriers are holding millions of people back, and the institutions that should help everyone rise are not doing the job. Crumbling communities. One-size fits all education. Businesses that rig the economy. Public policy that stifles opportunity and emboldens the extremes. As a result, this country is quickly heading toward a two-tiered society. Today's challenges call for

nothing short of a paradigm shift - away from a top-down approach that sees people as problems to be managed, toward bottom-up solutions that empower everyone to realize their potential and foster a more inclusive society. Such a shift starts by asking: What would it mean to truly believe in people? Businessman and philanthropist Charles Koch has devoted his life to answering that question. Learn what he's discovered during his 60-year career to help you apply the principles of empowerment in your life, in your business, and in society. By learning from the social movements and applying the

principles that have enabled social progress throughout history, Koch has achieved more than he dreamed possible - building one of the world's most successful companies and founding Stand Together, one of America's most innovative philanthropic communities. Stand Together CEO Brian Hooks and Koch show how the only way to solve the really big problems - from poverty and addiction to harmful business practices and destructive public policy - is for each and every one of us to find and take action in our unique role as part of the solution. Full of compelling examples of what works - including several

An argument that consciousness, more widespread than previously assumed, is the feeling of being alive, not a type of computation or a clever hack. In *The Feeling of Life Itself*, Christof Koch offers a straightforward definition of consciousness as any subjective experience, from the most mundane to the most exalted—the feeling of being alive. Psychologists study which cognitive operations underpin a given conscious perception. Neuroscientists track the neural correlates of consciousness in the brain, the organ of the mind. But why the brain and not, say, the liver? How can the

brain, three pounds of highly excitable matter, a piece of furniture in the universe, subject to the same laws of physics as any other piece, give rise to subjective experience? Koch argues that what is needed to answer these questions is a quantitative theory that starts with experience and proceeds to the brain. In *The Feeling of Life Itself*, Koch outlines such a theory, based on integrated information. Koch describes how the theory explains many facts about the neurology of consciousness and how it has been used to build a clinically useful consciousness meter. The theory predicts that

many, and perhaps all, animals experience the sights and sounds of life; consciousness is much more widespread than conventionally assumed. Contrary to received wisdom, however, Koch argues that programmable computers will not have consciousness. Even a perfect software model of the brain is not conscious. Its simulation is fake consciousness. Consciousness is not a special type of computation—it is not a clever hack. Consciousness is about being.

Walkington Pink was born in Nottingham, England, to a corn merchant, a devout non-conformist of uncertain denomination, though probably a Congregationalist. Otherwise, almost nothing is known of Pink's childhood or education except that he had some ability and training in music. As a young man, Pink joined the Theosophical Society and apparently rose to enough prominence within its ranks that Annie Besant, its head, offered to admit him to its leadership circle. In 1908 he renounced Theosophy for evangelical Christianity. Desiring to become a minister but unwilling to attend a liberal

theological college in England, Pink very briefly studied at Moody Bible Institute in Chicago in 1910 before taking the pastorate of the Congregational church in Silverton, Colorado. In 1912 Pink left Silverton, probably for California, and then took a joint pastorate of churches in rural Burkesville and Albany, Kentucky. In 1916, he married Vera E. Russell (1893-1962), who had been reared in Bowling Green, Kentucky. Pink's next pastorate seems to have been in Scottsville. Then the newlyweds moved in 1917 to Spartanburg, South Carolina, where Pink became pastor of Northside Baptist Church. By

this time Pink had become acquainted with prominent dispensationalist Fundamentalists, such as Harry Ironside and Arno C. Gaebelin, and his first two books, published in 1917 and 1918, were in agreement with that theological position. Yet Pink's views were changing, and during these years he also wrote the first edition of *The Sovereignty of God* (1918), which argued that God did not love sinners and had deliberately created "unto damnation" those who would not accept Christ. Whether because of his Calvinistic views, his nearly incredible studiousness, his weakened health, or his lack of
