autoimmune disorder, such as rheumatoid arthritis, type 1 diabetes, pernicious anemia, or lupus, are at an increased risk of developing the disease.

~~Graves Disease | Lab Tests Online~~

Celiac disease is an autoimmune disease of the digestive system in which the body's natural defense system reacts to gluten, a protein found in wheat, and to related dietary proteins in rye and barley. As part of this reaction, immune cells cause inflammation and damage to the lining of the small intestine and to the small tissue folds called villi that line the intestinal wall.

~~Celiac Disease | Lab Tests Online~~

General lab tests measure the levels of specific enzymes, bilirubin, and protein that may be abnormal when liver injury is present. A comprehensive metabolic panel (CMP) is a group of tests that is often done as part of general health screening. It includes several tests that help evaluate liver function.

~~Liver Disease | Lab Tests Online~~

If your GFR falls below 30 you will need to see a kidney disease specialist (called a nephrologist). A GFR below 15 indicates that you need to start a treatment for kidney failure. Your kidney disease specialist will speak to you about treatments for kidney failure, such as dialysis or kidney transplant.
