Searching for a specimen for your structure and function lab? Look no further than the dogfish. Students enjoy dogfish dissection, and they remember and refer to the activity long after they perform it. The specimen's many conspicuous and specialized organs make it ideal for studying structure and function.

The Dogfish Shark - Structure and FUNction! | Carolina.com

Virtual Shark Lab. Getting Started . In this lab you will study the anatomy of the shark. Humans are fascinated by sharks. We are at once repulsed and attracted to these predators. We fear them, often unnecessarily, because they are so at home in an environment in which we are so ungainly. They are fishes that are highly adapted to the ocean ...

This full-color manual is a unique guide for students conducting the comparative study of representative vertebrate animals. It is appropriate for courses in comparative anatomy, vertebrate zoology, or any course in which the featured vertebrates are studied. Includes coverage of the lamprey, dogfish shark, perch, mudpuppy, bullfrog, pigeon, and cat. Evolutionary concepts, comparative morphology, and histology are covered comprehensively. Loose-leaf and three-hole drilled.

Ideal for undergraduate comparative anatomy courses, this classic manual combines comprehensive illustrations, text, and a clear, readable design. Organisms include protochordates, lampry, dogfish shark, mud puppy, and cat.

Präparieren? Sobotta Präparieratlas! - Angepasst an die 24. Auflage Die Anatomie steht an, der Anatomie-Atlas und das Präparier-Besteck sind gekauft, das universitätseigene Präparierskript ist zur Hand - und ab gehts in den Präpariersaal. Aber halt - meinen teuren Atlas möchte ich nicht mitnehmen in den Präpariersaal, nur woher bekomme ich gute Abbildungen, die mir erklären, was ich am Körperspender wo genau sehe? Hier hilft der Sobotta Präparieratlas weiter! In diesem handlichen Atlas sind alle für das Präparieren wichtigen Sobotta-Abbildungen zusammengestellt, überaus realitätsnah, besonders detailliert wo nötig und zu speziellen Themen um echte Leichenfotos ergänzt. Das Präparierskript der Uni liefert die Anleitungen, der Sobotta Präparieratlas die Abbildungen dazu. Damit der gute Atlas zu Hause bleiben kann! Bilinguale Ausgabe Deutsch-Englisch mit lateinischer Nomenklatur The dissection course is due? Then the new Dissection Atlas is a must-have! This convenient hands-on atlas compiles all essential anatomic images necessary for successful dissection. Spiral binding and firm, wipeable pages make the Dissection Atlas the ideal companion for the dissection lab - combinable with all other atlases or lecture notes. Particularly detailed and realistic images make it easy to clearly recognise anatomic structures and, therefore, to master the real situation in the dissection lab. Ideally equipped for dissection class: Step by step.All body areas are bundled by chapter following the order in your course Layer by layer:Successive images allow effortless understanding of every single step in the dissection process For those who already study with the Sobotta Atlas: The chapter division is consistent with that of our three-volume Sobotta Atlas of Human Anatomy which facilitates consulting your books for reinforced learning. In addition, the original image numbers from the Sobotta Atlas are provided with each image - retrieval guaranteed! Bilingual Edition German - English with Latin Nomenclature

A guide for dissecting animals, beginning with the earthworm and progressing to more complex anatomies such as grasshopper, starfish, perch, and ultimately a fetal pig. Includes a chapter on dissecting flowers.

The Dissection of Vertebrates covers several vertebrates commonly used in providing a transitional sequence in morphology. With illustrations on seven vertebrates - lamprey, shark, perch, mudpuppy, frog, cat, pigeon - this is the first book of its kind to include high-quality, digitally rendered illustrations. This book received the Award of Excellence in an Illustrated Medical Book from the Association of Medical Illustrators. It is organized by individual organism to facilitate classroom presentation. This illustrated, full-color primary dissection manual is ideal for use by students or practitioners working with vertebrate anatomy. This book is also recommended for researchers in vertebrate and functional morphology and comparative anatomy. The result of this exceptional work offers the most comprehensive treatment than has ever before been available. * Received the Award of Excellence in an Illustrated Medical Book from the Association of Medical Illustrators * Expertly rendered award-winning illustrations accompany the detailed, clear dissection direction * Organized by individual organism to facilitate classroom presentation * Offers coverage of a wide range of vertebrates * Full-color, strong pedagogical aids in a convenient lay-flat presentation

One of the best ways for your students to succeed in their biology course is through hands-on lab experience. With its 46 lab exercises and hundreds of color photos and illustrations, the LABORATORY MANUAL FOR NON-MAJORS BIOLOGY, Sixth Edition, is your students' guide to a better understanding of biology. Most exercises can be completed within two hours, and answers to the exercises are included in the Instructor's Manual. The perfect companion to Starr and Taggart's BIOLOGY: THE UNITY AND DIVERSITY OF LIFE, as well as Starr's BIOLOGY: CONCEPTS AND APPLICATIONS, and BIOLOGY TODAY AND TOMORROW, this lab manual can also be used with any introductory biology text. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
