Event planners and venue managers are supremely prepared people, so it didn't surprise us that many of the hundreds of event planners we spoke with have a handy on-site kit that they bring with them every time they are on location at an event. The average number of items in an on-site kit was 15-20 items.

*43 critical items in event planners' on-site kits ...*

So, being 'out there' in the public eye definitely has it's ups and downs. Being a blogger and author or one of the largest equestrian blogs in the country brings with it some exciting opportunities to try new things that I ordinarily wouldn't get to try.

Overview. The EventKit framework provides access to calendar and reminders data so you and your users can create, retrieve, and edit calendar items in your app. In iOS, EventKit UI provides user interfaces you can implement in your app to let users create and edit calendar items. You can use EventKit to set up alarms and create recurring events. And if a change to the Calendar database occurs from outside your app, EventKit detects the change and sends a notification, allowing you to stay up ...
