GAUSS STUDENT SAMPLE PROBLEMS: SOLUTIONS 7 PROBLEM 6 X, Y and Z are positive integers such that $X^2 + Y^2 + Z^2 = 390$. What is the value of $X + Y + Z$? Find all possible solutions. SOLUTION 6 Since $20^2 = 400$ and $X^2 + Y^2 + Z^2 = 390 < 400$, we see that $X < 20$, $Y < 20$ and $Z < 20$. 1 Set up a spreadsheet with 1 to 19 down a column (X) and across a row (Y). In each cell, calculate $\sqrt{390 - X^2 - Y^2}$. 2. Look for integer values.

GAUSS STUDENT SAMPLE PROBLEMS: SOLUTIONS

Gauss was about 9 years old -- already a super genius (much like Wile E. Coyote.) His teacher hated math and hated Gauss (because he was so smart). As usual, the teacher walked into the class and gave them a horribly tedious arithmetic problem. They were to work on it and not bother him. Here was the day's problem: Add the integers from 1 to 100.

Practice Problems: Gauss's Law. Click here to see the solutions. 1. (easy) A student measures the electric flux through a closed spherical surface of volume V to be X. She then removes the charge from inside the spherical surface and places it in a closed cylindrical surface of volume V/2. She then claims that the flux through the cylindrical surface is 2X.

This is a brief version of the question. Some guy worked out 3^{10000} . Then he added up all the digits to make a number. Then he added up the digits of that number to make another number. He did this over and over again until there was only a one digit number. what was it. Steps please (working out) best answer to person who shows me "logical reasoning"..

Solving Gauss's problem also involves looking for structure, either by making "pairs" $(1+10=2+9=3+9=...=50+51)$, or by creating a second copy of the sum to make $100 \ 101$'s. In the past, some students have computed $1+2+3+4+5+6+7+8+9=45$ and used that to compute the sum for each group of 10:

Gauss' formula is a result of counting a quantity in a clever way. The problems Picturing Triangular Numbers, Mystic Rose, and Handshakes all use similar clever counting to come up with a formula for adding numbers. Answers: total from 1 to 10 = 55, total from 1 to 50 = 1275.
