Pain management is a popular topic for nursing students and one that is covered primarily during years 2 and 3 of pre-registration nursing courses. Caring for patients involves understanding and knowing how to manage and treat their conditions and illnesses, and the pain associated with them. An understanding of the mechanics of pain, how pain affects individuals and how pain can be treated is absolutely core to nursing study and practice and nurses need to be able to identify, assess and treat pain responsibly and as part of their broader care for patients. Pain is also a complex subject which needs to be skillfully taught and integrated with other topics. The authors deliver a distance learning Pain course, from which the book is being developed, and as such the book will include lots of learning tools and features to help

explore concepts, self-develop and acquire critical thinking skills - all essential throughout the nursing course. The emphasis of the book will not be on facts, physiology or pharmacology, but instead the book will draw on these things to help students develop a solid philosophy of care that encompasses good pain management. The book will also cover the patient perspective in depth and will have a problem-solving ethos that explores pain as a core aspect of care giving.

A book that brings the habits of reading to life Great readers are not made by genetics or destiny but by the habits they build—habits that are intentionally built by their teachers. The early formal years of education are the key to reversing the reading gap and setting up children for success. But K-4 education seems to widen the gap between stronger and weaker readers, not close it. Today, the Common Core further increases the pressure to reach high levels of rigor. What can be done? This book includes the strategies, systems, and lessons from the top classrooms that bring the habits of reading to life, creating countless quality opportunities for students to take one of the most complex skills we as people can know and to perform it fluently and easily. Offers clear teaching strategies for teaching reading to all students, no matter what level Includes more than 40 video examples from real classrooms Written by Paul Bambrick-Santoyo, bestselling author of *Driven by Data* and *Leverage Leadership* Great Habits, Great Readers puts the focus on: learning habits, reading habits, guided reading, and independent reading. Access to books is key to learning to read and sustaining a love of reading. Yet many low- and middle-income countries struggle to provide their students with reading materials of sufficient quality and quantity. Since 2008, RTI International has provided technical assistance in early reading assessment and instruction to ministries of education in dozens of low- and middle-income countries. The central objective of many of these programs has been to improve learning outcomes—in particular, reading—for students in the early grades of primary school. Under these programs, RTI has partnered with ministry staff to produce and distribute evidence-based instructional materials at a regional or national scale, in quantities that increase the likelihood that children will have ample opportunities to practice reading skills, and at a cost that can be sustained in the long term by the education system. In this paper, we seek to capture the practices RTI has developed and refined over the last decade, particularly in response to the challenges inherent in contexts with high linguistic diversity and low operational capacity for producing and distributing instructional materials. These practices constitute our approach to developing and producing instructional materials for early grade literacy. We also touch upon effective planning for printing and distribution procurement, but we do not consider the printing and distribution processes in depth in this paper. We expect this volume will be useful for donors, policymakers, and practitioners interested in improving access to cost-effective, high-quality teaching and learning materials for the early grades.
