If the plant is root bound, you can gently tease the roots apart to encourage outward growth. Pack your soil or other grow medium down around the roots well enough to support the plant while new roots grow, but not so tight that the soil restricts outward root growth. Water the soil around the roots.

## [How to Grow Marijuana from Seed - dummies](#)

The cannabis seeds need to sit at a warm, consistent temperature to germinate. Store the seeds out of direct sunlight in a warm area, such as the top of your refrigerator. You can try using a heat lamp near the seeds to keep them warm. Do not warm the seeds up too much, as you do not want your heat source to dry out the paper towels.

the legal requirements If you're curious about cannabis, everything you need to discover its many benefits is a page away!

With multiple US states adopting more progressive policies on marijuana for both medicinal and recreational use, the interest in marijuana cultivation has grown faster than the plants can be grown themselves. As a result, many people are starting to grow their own cannabis plants at home for self-consumption. The easiest and most popular way to cultivate marijuana is by growing it indoors. This method is advantageous in that you're not subject to the whim of the seasons, but can assert full control over the growing environment. It's also quite personally rewarding, as marijuana makes for a very interesting and unique houseplant. Even if you're starting from scratch and haven't had any previous experience growing marijuana, the growing process is something that's imminently teachable, and this step-by-step guide is designed to get you off to a great start.
