No matter where you are taking your exam or which area you need to focus on during your studying, Life and Health Insurance License Exam Cram is your smartest way to get certified. Please note: The CD-ROM and test engine is NOT Mac iOS compatible.

Over the past twenty years, many low- and middle-income countries have experimented with health insurance options. While their plans have varied widely in scale and ambition, their goals are the same: to make health services more affordable through the use of public subsidies while also moving care providers partially or fully into competitive markets. Colombia embarked in 1993 on a fifteen-year effort to cover its entire population with insurance, in combination with greater freedom to choose among providers. A decade later Mexico followed suit with a program tailored to its federal system. Several African nations have introduced new programs in the past decade, and many are testing options for reform. For the past twenty years, Eastern Europe has been shifting from government-run care to insurance-based competitive systems, and both China and India have experimental programs to expand coverage. These nations are betting that insurance-based health care financing can increase the accessibility of services, increase providers' productivity, and change the population's health care use patterns, mirroring the development of health systems in most OECD countries. Until now, however, we have known little about the actual effects of these dramatic policy changes. Understanding the impact of health insurance-based care is key to the public policy debate of whether to extend insurance to low-income populations—and if so, how to do it—or to serve them through other means. Using recent

household data, this book presents evidence of the impact of insurance programs in China, Colombia, Costa Rica, Ghana, Indonesia, Namibia, and Peru. The contributors also discuss potential design improvements that could increase impact. They provide innovative insights on improving the evaluation of health insurance reforms and on building a robust knowledge base to guide policy as other countries tackle the health insurance challenge.

This is a comprehensive and accessible reference source that documents the theoretical and practical aspects of all the key deterministic and stochastic reserving methods that have been developed for use in general insurance. Worked examples and mathematical details are included, along with many of the broader topics associated with reserving in practice. The key features of reserving in a range of different contexts in the UK and elsewhere are also covered. The book contains material that will appeal to anyone with an interest in claims reserving. It can be used as a learning resource for actuarial students who are studying the relevant parts of their professional bodies' examinations, as well as by others who are new to the subject. More experienced insurance and other professionals can use the book to refresh or expand their knowledge in any of the wide range of reserving topics covered in the book.

Licentiate (III) Exam Prep Workbook IC-02 Practice of Life Insurance: Licentiate Certification is essentially an introductory course dealing with the two compulsory papers i.e. Principles of Insurance and Practice of Insurance (Life and Non-Life) and one more paper as optional from This prep pack is developed as per revised syllabus, and questions were developed from following subject area 1. products9. General Insurance ProductsThe workbook consists of three practice set of 100 questions each and at the end of each practice set the answer table is give.

Argues that public finance--the study of the government's role in economics--should incorporate principles from behavior economics and other branches of psychology.

This book provides a comprehensive account of the theory and practice of takaful, which is an Islamic alternative to insurance. The concepts are explained using real-life case studies, calculations, and exhibits to aid in reader learning and reflection. Takaful, both as an academic subject and as well as practice, is growing particularly in the world leading financial and learning hubs such as in the UK and the USA and countries with large Muslim populations in Asia, Africa, and Middle East.
