A feckless boy is lured by a wicked magician into a trap but the scheme backfires — the boy, Aladdin, is left with a magical lamp and a genie who showers him with riches. Aladdin's wealth makes him an attractive suitor for the sultan's daughter, but when the evil sorcerer returns to kidnap the bride, the young hero must rescue his princess or die trying. This classic retelling of the ever-popular Middle Eastern folktale has entranced readers for over a century. Originally published in 1914 as part of Sindbad the Sailor and Other Stories from The Arabian Nights, this beautiful version by Laurence Housman features eight full-color images by Edmund Dulac, one of the era's most famous illustrators.

An introduction to the study of philosophy with discussions on several topics including God, politics, science and art.

Since the first edition of this book was published seven years ago, the field of modeling and simulation of communication systems has grown and matured in many ways, and the use of simulation as a day-to-day tool is now even more common practice. With the current interest in digital mobile communications, a primary area of application of modeling and simulation is now in wireless systems of a different flavor from the "traditional" ones. This second edition represents a substantial revision of the first, partly to accommodate the new applications that have arisen. New chapters include material on modeling and simulation of nonlinear systems, with a complementary section on related measurement techniques, channel modeling and three new case studies; a consolidated set of problems is provided at the end of the book.

The bestselling book revealing why Americans are so fearful, and why we fear the wrong things--now updated for the age of Trump In the age of Trump, our society is defined by fear. Indeed, three out of four Americans say they feel more fearful today than they did only a couple decades ago. But are we living in exceptionally perilous times? In his bestselling book The Culture of Fear, sociologist Barry Glassner demonstrates that it is our perception of danger that has increased, not the actual level of risk. Glassner exposes the people and organizations that manipulate our perceptions and profit from our fears: politicians who win elections by heightening concerns about crime and drug use even as rates for both are declining, advocacy groups that raise money by exaggerating the prevalence of particular diseases, TV shows that create a new scare every week to garner ratings. Glassner spells out the prices we pay for social panics: the huge sums of money that go to waste on unnecessary programs and products as well as time and energy spent worrying about our fears. All the while, we are distracted from the true threats, from climate change to worsening inequality. In this updated edition of a modern classic, Glassner examines the current panics over vaccination and "political correctness" and reveals why Donald Trump's fearmongering is so dangerously effective.

My name is Flora Padilla and I am a mother, grandmother, pastor, and an author. I married a man that physically, emotionally and mentally abused me. During this turbulent marriage, I was also trying to raise two small children, work full-time and financially support my household. Unexpectedly, I was injured on the job and lost the stability of having a steady income. This life-changing event shifted my path to my true calling. How did I become an overcomer against all odds? My book has the tools that I used to succeed, to be happy, blessed, victorious, and now an inspiration to others. I have spent my life "Mending Broken Hearts", because of my mended heart. Receive my story by faith.

Arnold's funniest book yet reintroduces the nervous hero from "Parts" and "More Parts" while also depicting more than 100 body-part idioms. Kids won't be able to keep a straight face as they enjoy this clever, wacky, boldly illustrated book. Full color.
