Timely and well-crafted, Interpreting LGBT History at Museums and Historic Sites is a must-read not only for professionals working with collections in museums, archives, libraries, and other cultural heritage institutions, but also for anyone in the communities they seek to engage. Ferentinos provides a convincing rationale for why LGBT history and interpretation matters, as well as a clear framework for how it can – and should – be shared.

Interpreting LGBT History at Museums and Historic Sites provides a straightforward, accessible guidebook for museum and history professionals as they embark on such worthy efforts.

Interpreting Difficult History at Museums and Historic Sites is framed by educational psychoanalytic theory and positions museum workers, public historians, and museum visitors as learners. Through this lens, museum workers and public historians can develop compelling and ethical representations of historical individuals, communities, and populations who have suffered. It includes various examples of difficult knowledge, detailed examples of specific interpretation methods, and will give readers an in-depth explanation of the psychoanalytic educational theories behind the methodologies. Audiences can more responsibly and productively engage in learning histories of oppression and trauma when they are in measured and sensitive museum learning environments and public history venues. To learn more, check out the website here: http://interpretingdifficulthistory.com/

In this landmark guide, nearly two dozen essays by scholars, educators, and museum leaders suggest the next steps in the interpretation of African American history and culture from the colonial period to the twentieth century at history museums and historic sites. This diverse anthology addresses both historical research and interpretive methodologies, including investigating church and legal records, using social media, navigating sensitive or difficult topics, preserving historic places, engaging students and communities, and strengthening connections between local and national history. Case studies of exhibitions, tours, and school programs from around the country provide practical inspiration, including photographs of projects and examples of exhibit label text. Highlights include: Amanda Seymour discusses the prevalence of "false nostalgia" at the homes of the first five presidents and offers practical solutions to create a more inclusive, nuanced history. Dr. Bernard Powers reveals that African American church records are a rich but often overlooked source for developing a more complete portrayal of individuals and communities. Dr. David Young, executive director of Cliveden, uses his experience in reinterpreting this National Historic Landmark to identify four ways that people respond to a history that has been too often untold, ignored, or appropriated—and how museums and historic sites can constructively respond. Dr. Matthew Pinsker explains that historic sites may be missing a huge opportunity in telling the story of freedom and emancipation by focusing on the underground railroad rather than its much bigger "upper-ground" counterpart. Martha Katz-Hyman tackles the challenges of interpreting the material culture of both enslaved and free African Americans in the years before the Civil War by discussing the furnishing of period rooms. Dr. Benjamin Filene describes three "micro-public history" projects that lead to new ways of understanding the past, handling source limitations, building partnerships, and reaching audiences. Andrea Jones shares her approach for engaging students through historical simulations based on the "Fight for Your Rights" school program at the Atlanta History Center. A exhibit on African American Vietnam War veterans at the Heinz History Center not only linked local and international events, but became an award-winning model of civic engagement. A collaboration between a university and museum that began as a local history project interpreting the Scottsboro Boys Trial as a website and brochure ended up changing Alabama law. A list of national organizations and an extensive bibliography on the interpretation of African American history provide convenient gateways to additional resources.

Interpreting Agriculture in Museums and Historic Sites orients readers to major themes in agriculture and techniques in education and interpretation that can help you develop humanities-based public programming that enhance agricultural literacy. Case studies illustrate the ways that local research can help you link your history organization to compelling local, national (even international) stories focused on the multidisciplinary topic. That ordinary plow, pitch fork, and butter paddle can provide the tangible evidence of the story worth telling, even if the farm land has disappeared into subdivisions and agriculture seems as remote as the nineteenth century. Other topics include discussion of alliances between rural tourism and community-supported agriculture, farmland conservation and stewardship, heritage breed and seed preservation efforts, and antique tractor clubs. Any of these can become indispensable partners to history organizations searching for a new interpretive theme to explore and new partners to engage.

A complete guide to interpreting women’s history. Women’s history is everywhere, not only in historic house museums named for women but also in homes named for famous men, museums of every conceivable kind, forts and battlefields, even ships, mines, and in buckets. Women’s history while present at every museum and historic site remains less fully interpreted in spite of decades of vibrant and expansive scholarship. Doing Women’s History in Public: A Handbook for Interpretation at Museums and Historic Sites connects that scholarship with the tangible resources and the sensuality that form museums and historic sites-- the objects, architecture and landscapes-- in ways that encourage visitor fascination and understanding and center interpretation on the women active in them. With numerous examples that focus on all women and girls, it appropriately includes everyone, for women intersect with every other human group. This book provides arguments, sources (written, oral, and visual), and tools for finding women’s history, preserving it, and interpreting it with the public. It uses the framework of Significance (importance), Knowledge Base (research in primary, secondary, and tertiary sources), and Tangible Resources (the preserved physical embodiment of history in objects, architecture, and landscapes). Discusses traditional and technology-assisted interpretation and provides Tools to implement Doing Women’s History in Public. Using a hospitality model, museums and historic sites are the locales where we assemble, learn from each other, and take our insights into a more gender-shared future.

This book moves the field forward in its collective conversation about the interpretation of slavery—acknowledging the criticism of the past and acting in the present to develop an inclusive interpretation of slavery.

"Over one hundred years ago, women organized to fight for a federal suffrage amendment. But many suffragists were fighting for much more than the vote. The suffrage movement included individuals who represented a wide range of genders and sexualities. It also included a variety of queer relationships. But, suffrage leaders concerned with presenting a respectable public image concealed the queerness of the suffrage movement. This resulted in greater policing of suffragist behavior as suffrage leaders, many of them queer themselves, publicly conformed to gendered views of acceptable appearance and behavior. The problematic effect was to erase the queer history of the movement. Instead suffrage leaders reinforced a patriarchal, heteronormative, cisgender standard of ideal femininity in order to make suffragists and women’s suffrage more palatable to the public. The legacy of queer suffragists, however, could not be so easily erased. This book explores how queer women led the suffrage movement while challenging heteronormative concepts of domesticity, family, space, and death in both subtly subversive and radically transformative ways. This book also highlights the alliances that queer suffragists built and the innovative strategies they developed to protect and preserve their most intimate relationships - relationships that were ultimately crucial to the success of the suffrage movement"--

Museum Innovation encourages museums to critically reflect upon current practices and adopt new approaches to their civic responsibilities. Arguing that museums have a moral duty to perform, the book shows how social innovation can make them more equitable, relevant and impactful institutions. Including contributions from a diverse group of international scholars, practitioners and researchers, the book investigates the innovative approaches museums are taking to address contemporary social issues. The volume focuses on the concept of social innovation and individual chapters address a range of crucial issues, such as climate change; the COVID-19 pandemic; diversity and inclusion; the travel ban; and the repatriation of museum collections. Exploring the impact that organizational structures have on museums’ aspirations to act as agents for social change, the book also unpacks how museums can establish sustainable relationships with minority communities. Proposing steps that museums can take to affirm their relevance as viable community partners, the book breaks down silos and connects ideas across different areas of museum work. Museum Innovation explores the role of contemporary museums in society. It is essential reading for academics, students and practitioners working in the museum and heritage studies field. The book’s interdisciplinary nature makes it also an interesting read for those working in business studies, digital humanities, visual culture, arts administration and political science fields.

Art and Public History: Approaches, Opportunities, and Challenges provides public history practitioners and academics with useful guidance on how art can be integrated into public history initiatives, through critical discussion of tools, strategies, and technologies that contribute to collaboration and engagement across a variety of platforms.
