i done the job on my bighorn 4GJ2 engine, its a belt for sure it has 119 teeth and 32mm wide, i can get you the exact isuzu item code if you wish, isuzu belt will cost you about £ 36 inc of vat. the damper pully is held on by 4 x M8 screws, you will need a longish 12mm hex socket to reach them if i remember correctly -- hope this helps... i beleve solid grears are used but not for normal production models.. but i may well be wrong.
