Reading is a many-faceted subject. A book on the topic may, like many, be a description of the physiological steps one takes in performing the process called reading. More commonly, it is a manual, describing the methods a teacher may use in teaching schoolage children to acquire the mechanical aspects of reading. Some, far fewer, are focused on the psychology of reading, such psychology usually emphasizing the conscious and logical approaches to learning. Still others are directed toward some particular part of reading in its socio-historical setting, as for example, freedom to read, or adult reading habits, or variation in trends in the production of materials. All books of such nature are relevant to the omnibus topic-reading. A book which would include reading in its historical, sociological, and educational setting would indeed be a major undertaking, demanding both scope and depth of knowledge from its author. Frank Jennings has written such an inclusive book, and he appropriately calls it This Is Reading.

In June 2008 Ben Cunningham and five friends set out to cycle the Pan-American Highway from the northernmost point of Alaska to the most southerly city in the world. Along the way the kindness of strangers, run-ins with the law, and sometimes gangsters, were encountered. The task was as simple as it is brutal. This is an inspirational tale of adventure and endurance; of what can happen when you get on your bike; and of getting to where you want to be.
