Josephine Horne ignores convention. She never intends to marry, so why should she be hedged about with rules? When loyalty to a friend demands Jo risk her own reputation, she doesn't hesitate. Then she meets handsome Harry Beverley, and her ideas about marriage begin to change.... Hal must marry for duty, and already has a respectable bride in mind. His attraction to the unruly, rebellious Miss Horne is ridiculous! Both Hal and Jo have a lesson to learn—and

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.

Why do we forget about people when we talk about innovation? Innovation has been a popular subject for the last years. Bruce Nussbaum, perhaps exaggerating, said “ Innovation died in 2008, killed off by overuse, misuse, narrowness, incrementalism and failure to evolve. It was done by CEOs, consultants, marketeers, advertisers and business journalists who degraded and devalued the idea by conflating it with change, technology, design, globalization, trendiness, and anything new. It was done by an obsession with measurement, metrics and maths and a demand for predictability in an unpredictable world. ” If so, why another book on innovation? Because it is not one more book on the subject! It is a book that does not talk about innovation, but about people. Is there anything as important as people when innovating? This book describes how to create a true culture of innovation, a culture where innovation is not an objective, but a consequence.
