Prepared by the Technical Council on Lifeline Earthquake Engineering of ASCE. This TCLEE Monograph covers the entire range of fire following earthquake (FFE) issues, from historical fires to 20th-century fires in Kobe, San Francisco, Oakland, Berkeley, and Northridge. FFE has the potential of causing catastrophic losses in the United States, Japan, Canada, New Zealand, and other seismically active countries with wood houses. Topics include: History of past fires; Computer modeling of fire spread in the post-earthquake urban environment; Concurrent damage and fire impacts for water, power gas, communication and transportation systems; Examples of reliable water systems built or designed in San Francisco, Vancouver, Berkeley, and Kyoto; Use of large diameter (5 in.) and ultralarge diameter (12 in.) flex hose for fire fighting and water restoration; and Cost-effectiveness of various FFE mitigation strategies, with a detailed benefit-cost model. Water utility engineers, fire fighting professionals, and emergency response planners will benefit from reading this book.

All Souls Legal Cooperative's final appeal sends San Francisco's number one PI Sharon McCone behind the footlights into the super-charged arena of anxious club owners and aspiring young hopefuls, into the fractured world of Tracy's privileged family and the mind of a young comedienne who was not the good little girl they thought they knew. and into a labyrinth of death and deception where someone will kill to laugh last and get away with murder.

In this electrifying bestseller, the shrewd and voluble trial lawyer Louis Nizer, who made a long career of representing famous people in famous cases, recounts some of his significant civil and criminal cases. Nizer rose to national fame with his real-life accounts of tension-filled courtrooms and the fervor of the advocate, and "My Life in Court" proved to be no exception: it rose to the top of the Times's best-seller list on its publication in 1961 and logged 72 weeks as a sales leader. The book is an in-depth collection of some of Mr. Nizer's court case success stories, including his client Quentin Reynolds' famous libel action against the columnist Westbrook Pegler, which would also become the basis of the 1963 Broadway play "A Case of Libel." Praised by critics as "entertaining and philosophically instructive, an unusual combination," Nizer's movie-like plots of real-life courtroom drama will keep you captivated until the very last page.

An ordinary man's account of an extraordinary sport—marathon running"Marathons make you miserable, but they also give you the most unlikely and the most indescribable pleasures. It's a world that I love—a world unlocked when you dress up in lycra, put plasters on your nipples and run 26.2 miles in the company of upwards of 30,000 complete strangers."Phil Hewitt sets a fast pace in this light-hearted account of his adventures on the road. He has completed over 20 marathons in conditions ranging from blistering heat to snow and ice, and in locations from Berlin to New York. This story of an ordinary guy's addiction to running marathons looks at the highs and lows, the motivation that keeps you going when your body is crying out to stop, and tries to answer the ultimate question, "Why do you do it?"

In War, Wine, and Taxes, John Nye debunks the myth that Britain was a free-trade nation during and after the industrial revolution, by revealing how the British used tariffs—notably on French wine—as a mercantilist tool to politically weaken France and to respond to pressure from local brewers and others. The book reveals that Britain did not transform smoothly from a mercantilist state in the eighteenth century to a bastion of free trade in the late nineteenth. This boldly revisionist account gives the first satisfactory explanation of Britain's transformation from a minor power to the dominant nation in Europe. It also shows how Britain and France negotiated the critical trade treaty of 1860 that opened wide the European markets in the decades before World War I. Going back to the seventeenth century and examining the peculiar history of Anglo-French military and commercial rivalry, Nye helps us understand why the British drink beer not wine, why the Portuguese sold liquor almost exclusively to Britain, and how liberal, eighteenth-century Britain managed to raise taxes at an unprecedented rate—with government revenues growing five times faster than the gross national product. War, Wine, and Taxes stands in stark contrast to standard interpretations of the role tariffs played in the economic development of Britain and France, and sheds valuable new light on the joint role of commercial and fiscal policy in the rise of the modern state.
