hour workweek to present-day speculation about automation, we have not stopped forecasting the end of work. Critical theory and political philosophy have turned their attention away from the workplace to focus on other realms of domination and emancipation. But far from coming to an end, work continues to occupy a central place in our lives. This is not only because of the amount of time people spend on the job. Many of our deepest hopes and fears are bound up in our labor—what jobs we perform, how we relate to others, how we might flourish. *The Return of Work in Critical Theory* presents a bold new account of the human significance of work and the human costs of contemporary forms of work organization. A collaboration among experts in philosophy, social theory, and clinical psychology, it brings together empirical research with incisive analysis of the political stakes of contemporary work. *The Return of Work in Critical Theory* begins by looking in detail at the ways in which work today fails to meet our expectations. It then sketches a phenomenological description of work and examines the normative premises that underlie the experience of work. Finally, it puts forward a novel conception of work that can renew critical theory's engagement with work and point toward possibilities for transformation. Inspired by Max Horkheimer's vision of critical theory as empirically informed reflection on the sources of social suffering with emancipatory intent, *The Return of Work in Critical Theory* is a lucid diagnosis of the malaise and pathologies of contemporary work that proposes powerful remedies.

This fifth edition of Tony Bush's bestselling text

explores the links between educational management theories and the main models of leadership, and their application to policy and practice globally across varied educational contexts. This fully updated new edition is informed by an enhanced global perspective and expanded coverage of important contemporary issues including teacher leadership, professional learning communities, transformational leadership, instructional leadership and a critical assessment of distributed leadership. This is essential reading for all teachers who aspire to management, as well as for experienced leaders on Masters ' level courses, and for those studying school management as part of education degrees.

This book considers a number of key epistemological, ontological and methodological questions exploring the effectiveness of school leadership and management development training programmes for school leaders in a range of settings and for a range of people. Consideration is also given to practical concerns associated with this topic, such as the importance of management and Leadership Development programmes supporting school leaders to become effective leaders supporting school effectiveness. Effectiveness of School Leadership and Management Development in Cameroon addresses key methodological issues including the rationale for adopting a qualitative mixed-methodology research approach with elements of literature and documental analysis; surveys; ethical considerations and challenges with sampling techniques in considering the impact that school leaders in Cameroon have on researchers ' findings; and the production of knowledge. In addressing such topics, it

answers important questions about how reliability can be ensured, how rigour can be safeguarded and what impact documental analysis and school leaders' views have on the validity and interpretation of research findings. This book is the first of its kind to combine practical leadership theories in developing leadership development frameworks reflections with clearly presented recommendations about how the approach can be used. It will be invaluable to academics, practitioners and other agencies wishing to adopt participatory research methods which place school leaders and their schools at the centre of this research. This book is also an essential read for academics and students with an interest in qualitative mixed methodologies on leadership development of school leaders, and will become a key text for school leadership research methods courses, given its concern with practical leadership models as well as more complex leadership development theories.

Now available from ASM Press, this lavishly illustrated atlas sets the standard for innovative techniques in medical mycology. It illustrates the diversity of fungal agents and provides ample molecular data for the majority of clinically relevant fungi. In addition, antifungal susceptibility data is given for most species, providing essential knowledge for the clinician in view of adequate therapy. Numerous emerging opportunistic species are covered including recently described agents of brain infection such as *Ramichloridium mackenziei* and *Cladophialophora modesta*, as well as several *Trichoderma* species. Molecular data include rDNA SSU restriction maps for genera and rDNA ITS restriction maps for species. Phylogenetic overviews of

the fungal Kingdom in general, and many important groups in detail, are also provided. This comprehensive volume also offers a list of doubtful names and insufficiently proven cases and references more than 3,400 fungal names that have appeared in the medical literature.

In this handbook, scholars from around the world offer an up-to-date account of the state of the art in different areas of onomastics, in a format that is both useful to specialists in related fields and accessible to the general reader. All known languages make use of names, most commonly to identify individual people and places. Since Ancient Greece, names have been regarded as central to the study of language, and this has continued to be a major theme of both philosophical and linguistic enquiry throughout the history of Western thought. The investigation of name origins is more recent, as is the study of names in literature. Relatively new is the study of names in society, which draws on techniques from sociolinguistics and has gradually been gathering momentum over the last few decades. The structure of this volume reflects the emergence of the main branches of name studies, in roughly chronological order. The first Part focuses on name theory and outlines key issues about the role of names in language, focusing on grammar, meaning, and discourse. Parts II and III deal with the study of place-names and personal names respectively, while Part IV outlines contrasting approaches to the study of names

in literature, with case studies from different languages and time periods. Part V explores the field of socio-onomastics, with chapters relating to the names of people, places, and commercial products. Part VI then examines the interdisciplinary nature of name studies, before the concluding Part presents a selection of animate and inanimate referents ranging from aircraft to animals, and explains the naming strategies adopted for them.

Now updated and expanded to cover the latest technologies, this full-color text on clinical refraction uses an easy-to-read format to give optometry students and practitioners all the important information they need. Also covers a wide range of other aspects of the eye exam, including anterior and posterior segment evaluations, contact lens, ocular pharmacology, and visual field analysis. Four new chapters cover wavefront-guided refraction, optical correction with refractive surgeries, prosthetic devices, and patients with ocular pathology. Offer precise, step-by-step how-to's for performing all of the most effective refractive techniques. Presents individualized refractive approaches for the full range of patients, including special patient populations. Contributors are internationally recognized, leading authorities in the field. New full-color design with full-color images throughout. Completely updated and expanded to include current technologies. A new chapter on Optical Correction with Refractive Surgeries, including keratoplasty, traditional refractive surgeries (e.g. LASIK and PRK), crystalline lens extraction with and without pseudophakia, the new presbyopic surgery, etc. A new chapter on Wavefront Guided Refraction
