Charcoal Foundry,
the first book in the
"Metal Working
Shop From Scrap
Series", gives you
plans for building a
metal melting
furnace and
instructions on
basic pattern
making and

Molding. All the information needed to set up a foundry in your work shop can be found in this book. Simply stated, if you can build a sand castle or make a mud pie, you can make a sand mold to produce castings for your metal shop projects. The main

Ingredient in these projects is scrap aluminum and pot metal. The only tools you need to get started are ordinary home shop hand tools, many of which are probably already in your possession. Much of the remainder is found as salvage or cast-

off and little
expense need be
involved. The
charcoal foundry is
simple to build and
operate and the
initial cost is so low
that it can be in the
reach of nearly
anyone. And the
fundamentals of
pattern-making
and molding are
easily understood

Download Free Machine Shop Practice Vol. 1

Once you have built the charcoal foundry and the metal lathe in book 2, there is little beyond your reach by way of shop equipment. Build as large or small as you wish and you are your own parts supply company. If you already have

shop equipment,
you will find that
adding a foundry to
your shop greatly
expands your
capacity. Being
able to produce
your own castings
for accessories and
equipment is a
great advantage.
Design your own,
make a copy or

follow a plan. It's
easy when you're
in control and can
produce your own
castings.
