Scholars are increasingly investigating photography's broad cultural role, expanding our understanding of the diversity of photographic practices. Kim Timby contributes to this new history of photography by examining the multifaceted story of images that animate with a flick of the wrist or appear vividly three-dimensional without the use of special devices—both made possible by the lenticular process. Using French case studies, this volume broadly weaves 3D and animated lenticular imagery into scientific and popular culture, from early cinema

and color reproduction to the birth of modern advertising and the market for studio portraits, postcards, and religious imagery. The motivations behind the invention and reinvention of this pervasive form of imagery, from the turn of the twentieth century through the end of the pre-digital era, shed new light on our relationship to photographic realism and on the forceful interplay in photography between technological innovation and the desire to be entertained. 3D and Animated Lenticular Photography: Between Utopia and Entertainment is a profusely illustrated and engaging interdisciplinary study of a wide-ranging body of images that have fascinated viewers for generations.

The Cinema of Wim Wenders, the first anthology of scholarly work on Wenders, is a unique anthropology of source materials and selected critical essays on the films of Wim Wenders, a major filmmaker in the so-called New German Cinema movement. His work, probably more than that of any other European director, reflects the tension between the European auteur tradition and the increasing dominance of the American media industry. In both his filmmaking and his critical writing, he explores how the relationship between image and narrative manifests the basic opposition between these two film traditions. This book serves as an introduction to the central concerns
