Molarity and Dilution Lab. Introduction: Solutions are an important part of chemistry. In this lab you will practice preparing solutions of different concentrations. The amount of solute that is dissolved in a given quantity of solvent is expressed as the concentration of the solution. A dilute solution contains only a small amount of solute in ...

Molarity and Dilution: Opis This is an inquiry activity with graphing and includes a hands-on lab as well. Learning Goals: Students will be able to A.Determine the solubility for some solutes and explain why the solubility cannot be determined for others given experimental constraints.

## Molarity and Dilution - PhET Doprinosi

The site has added unlimited practice problems for two categories of solutions, molarity & dilutions. You can calculate the molarity of a solution given grams or moles, or calculated the volume, moles or mass of a substance given two of the variables. Many can me done with just a calculator, but you should download a periodic table (Texas Chemistry STAAR Reference Materials) for the molar masses you will need. Dilutions calculations are also on-line.

## Mr. Christopherson / Solutions

Since the molar amount of solute and the volume of solution are both given, the molarity can be

calculated using the definition of molarity. Per this definition, the solution volume must be converted

from mL to L:  $(3.4.1) M = \frac{\text{molsolute}}{\text{Lsolution}} = \frac{0.133 \text{ mol}}{355 \text{ mL}} \times \frac{1 \text{ L}}{1000 \text{ mL}} = 0.375$
