A significant contribution, Nature Cures provides a valuable perspective on the unconventional therapies that for many decades have, to the dismay of organized medicine, attracted large numbers of Americans engaged in the pursuit of health.

Nature Cures: The History of Alternative Medicine in ...

From reflexology and rolfing to shiatsu and dream work, we are confronted today by a welter of alternative medical therapies. But as James Whorton shows in Nature Cures, the recent explosion in alternative medicine actually reflects two centuries of competition and conflict between mainstream medicine and numerous unorthodox systems. This is the first comprehensive history of alternative medicine in America, examining the major systems that have emerged from 1800 to the present.

An overview article on the nature of history. The principal office of history I take to be this: to preserve the memory of virtuous actions, and to prevent evil words and deeds by instilling the fear of an infamous reputation with posterity - Tacitus (55 - 117AD)

History in Focus: the nature of history (article)

A cathedral to nature. While the building reflects Waterhouse ' s characteristic architectural style, it is also a monument to Owen ' s vision of what a museum should be. In the mid-nineteenth century, museums were expensive places visited only by the wealthy few, but Owen insisted the Natural History Museum should be free and be accessible to all.

Nature Cures: The History of Alternative Medicine in ...

Arthur Marwick's The New Nature of History: Knowledge, Evidence, Language was published by Palgrave July 2001. Addressing the key questions of what history is, and why and how one studies it, the book is a positive affirmation of the vital importance to society of the study of the past, and of the many crucial learning outcomes which accrue from historical study.

History in Focus: What is History? (Introduction)

While modern societies typically see history as a linear movement — either ever improving or declining from a past high — ancient and traditional cultures believed time was cyclical, just like the waxing and waning of the moon, the rising and setting of the sun, the birth and death of living creatures, the planting and harvesting of crops, and the seasons of the year.

Natural history is a domain of inquiry involving organisms, including animals, fungi, and plants, in their natural environment, leaning more towards observational than experimental methods of study. A person who studies natural history is called a naturalist or natural historian.. Natural history encompasses scientific research but is not limited to it. It involves the systematic study of any ...
