APRIL 2015 The four global forces breaking all the trends

KUALA LUMPUR, Nov 14 — Lembaga Urus Air Selangor (LUAS) and Air Selangor have detected an odour pollution measuring about four TON (Threshold Odour Number) in Sungai Kundang at midnight, last night. The odour pollution is believed to be sourced from the overflow of a pond near the Indah Water...

Our intuition on how the world works could well be wrong. We are surprised when new competitors burst on the scene, or businesses protected by large and deep moats find their defenses easily breached, or vast new markets are conjured from nothing. Trend lines resemble saw-tooth mountain ridges. The world not only feels different. The data tell us it is different. Based on years of research by the directors of the McKinsey Global Institute, No Ordinary Disruption: The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy: the rise of emerging markets, the accelerating impact of technology on the natural forces of market competition, an aging world population, and accelerating flows of trade, capital and people. Our intuitions formed during a uniquely benign period for the world economy—often termed the Great Moderation. Asset prices were rising, cost of capital was falling, labour and resources were abundant, and generation after generation was growing up more prosperous than their parents. But the Great Moderation has gone. The price of everything from grain to steel may become more volatile. The world's labor force could shrink. Individuals, particularly those with low job skills, are at risk of growing up poorer than their parents. What sets No Ordinary Disruption apart is depth of analysis combined with lively writing informed by surprising, memorable insights that enable us to quickly grasp the disruptive forces at work. For evidence of the shift to emerging markets, consider the startling fact that, by 2025, a single regional city in China—Tianjin—will have a GDP equal to that of the Sweden, of that, in the decades ahead, half of the world's economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard-pressed to locate on a map. What we are now seeing is no ordinary disruption but the new facts of business life—facts that require executives and leaders at all levels to reset their operating assumptions and management intuition.

In this work Jean-Marie Dru describes disruption as a universal language of change that allows advertisers from all over the world to form a common strategy.

A blueprint for reinventing the core of your business Value in the next phase of the digital era will go to those companies that don't just try digital but also scale it. Digital@Scale examines what it takes for companies to break through the gravitational pull of their legacy organizations and capture the full value of digital. Digging into more than fifty detailed case studies and years of McKinsey experience and data, the authors, along with a group of expert contributors, show how companies can move beyond incremental change to transform the business where the greatest value is generated—at its core. The authors provide practical insights into the three pillars of digital transformations that successfully scale: reinventing the business model, building out a business architecture from the customer back into the organization, and establishing an 'amoeba' IT and organizational foundation that learns and evolves. This is the ideal guide for all leaders who recognize the power and promise of a digital transformation.

Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement

A radically inclusive, intersectional, and transnational approach to the fight for women's rights. Upper-middle-class white women have long been heralded as "experts" on feminism. They have presided over multinational feminist organizations and written much of what we consider the feminist canon, espousing sexual liberation and satisfaction, LGBTQI inclusion, and racial solidarity, all while branding the language of the movement itself in whiteness and speaking over Black and Brown women in an effort to uphold privilege and perceived cultural superiority. An American Muslim woman, attorney, and political philosopher, Raia Zakaria champions a reconstruction of feminism in Against White Feminism, centering women of color in this transformative overview and counter-manifesto to white feminism's global, long-standing affinity with colonial, patriarchal, and white supremacist ideals. Covering such ground as the legacy of the British feminist imperialist savior complex and "the colonial thesis that all reform comes from the West" to the condescension of the white feminist-led "aid industrial complex" and the conflation of sexual liberation as the "sum total of empowerment," Zakaria follows in the tradition of intersectional feminist forebears Kimberlé Crenshaw, Adrienne Rich, and Audre Lorde. Zakaria ultimately refutes and reimagines the apolitical aspirations of white feminist empowerment in this staggering, radical critique, with Black and Brown feminist thought at the forefront.

"One hour with this book will make you an expert on business in China." - Dick Gephardt, Majority-Minority Leader, U.S. House of Representatives, 1989-2002 "Without question, the best 60 minutes you will spend on China." - Jonathan Anderson, Emerging Markets Advisors This is the China book for everyone - whether an expert or novice. It can be read in an hour and gives you most of what you need to know about China business today - and its increasing impact on the rest of the world. This "speed-read" book is the distilled knowledge of two Peking University business professors with over 30 years of experience on the ground in China and the emerging markets. According to authors Jeffrey Towson and Jonathan Woetzel, "if we had the undivided attention of someone from Ohio, Brighton or Lima for just one hour, this little book is what we would say." Author Jonathan Woetzel is a senior partner of McKinsey & Company. He opened McKinsey's Shanghai location in 1995 and has been resident since then. He currently the global leader of its Cities Special Initiative and the Asia-based Director of the McKinsey Global Institute. He has led many of the Firm's most significant projects in China including the first major international listing of a Chinese company and the development of the economic plans for the cities of Shanghai, Wuhai, Shenzhen, Xian and Harbin among others. He co-chairs the Urban China Initiative along with Tsinghua University and Columbia University to catalyze the next stage of China's urbanization. Author Jeffrey Towson is a private equity investor, professor and best-selling author. His area of expertise is developing economy investing and cross-border strategies - primarily US-China deals in healthcare and consumer products. He was previously Head of Direct Investments for Middle East North Africa and Asia Pacific for Prince Alwaleed, nicknamed by Time magazine the "Arabian Warren Buffett" and arguably the world's first private global investor.

The definition of great leadership, backed by ground-breaking research When Execution Isn't Enough examines the essential leadership skills that go beyond simply executing strategies well. It examines the leadership skills that inspire excellence and drive growth. Great leaders think differently, but their secrets, values, and behaviors can't be bottled—or can they? Is leadership so contextual that it defies standardization? In this book, McKinsey's global head of leadership development draws on ground-breaking McKinsey research to uncover 20 distinct leadership traits. All are important, but some make all the difference in inspiring organizations to exceptional results and growth—and a select few create the vast chasm between strong and weak organizations in terms of leadership effectiveness. Structured as a business parable, this book employs a rich cast of corporate characters to illustrate the critical behaviors of inspirational leadership and the outcomes that become possible. Attempting to nail down exactly what makes a leader inspirational is like trying to capture lightning in a bottle, but new McKinsey research has identified the behavioral leadership catalysts that inspire greatness. This book describes the behaviors to inspire that can be learned—to turn a good leader into a great leader. Understand the neuroscience of inspiration Tailor your inspirational approach to different leadership scenarios Initiate an inspiration cascade to influence people at scale The picture of leadership has changed over time. Today's great leaders are authentic, enthusiastic decision-makers with engaging visions, who are quick to communicate and take action. Less than half of all CEOs believe that their training investments will pay off, yet everyone agrees that leadership drives performance—where is the disconnect? It's in the belief that simple leadership behaviors equal results, forgetting that exceptional results only come from inspiration. When Execution Isn't Enough shows you how to attain the missing link of great leadership to bring exceptional results of your organization.
