The PI OPC DA interface is started using a Windows batch file that invokes the interface executable and specifies settings using command line parameters. To ensure a correctly- formatted batch file, do not edit the batch file manually: use PI ICU. For a complete list of UnInT startup parameters, refer to the UnInT Interface User Manual.

PI OLEDB Provider Overview The PI System itself is not a relational database, but it is possible to expose PI System data in a relational way. The classic PI OLEDB Provider implements SQL to allow relational queries to be run against the PI Data Archive, the PI Point Database and other configuration data. This product is mostly used in the context of other OLE DB-compliant products such as ...
