confronted by – the use of small amounts of data to explain wide ranging theories. Webb mentions this problem in his introduction and returns to it in more depth later in the book (Chapter 12), but this doesn't stop him from extrapolating what are essentially regionally specific data to the continent as a whole.

*Aboriginal Health - Aboriginal Studies
Health And Disease Across
Resources*

Aboriginal health is majorly determined by several social factors that are related to their cultural beliefs. Health professionals regularly find it difficult to provide health care to aboriginal people due to the cultural disparity that exists between the conventional and aboriginal cultures, predominantly with regard to systems of health belief (Carson, Dunbar, & Chenhall, 2007).

*Social Exclusion of the Aboriginal
Population of Australia ...*

The Victorian Aboriginal Health Service, an almost 50-year-old institution in the heart of Fitzroy, knew early on that social isolation would be a major issue, so it developed its own crisis line.
