The seminal, uncollected essays—lauded as “dazzling” (The New York Times Book Review)—by the late Christopher Hitchens, author of the #1 New York Times bestseller God Is Not Great, showcase the notorious contrarian’s genius for rhetoric and his sharp rebukes to tyrants and the ill-informed everywhere. For more than forty years, Christopher Hitchens delivered essays to numerous publications on both sides of the Atlantic that were astonishingly wide-ranging and provocative. His death in December 2011 from esophageal cancer prematurely silenced a voice that was among the most admired of contemporary voices—writers, readers, pundits and critics the world over mourned his loss. At the time of his death, Hitchens left nearly 250,000 words of essays not yet published in book form. “Another great book of essays from a writer who we wish were still alive to produce more copy” (National Review). And yet... ranges from the literary to the political and is a banquet of entertaining and instructive delights, including essays on Orwell, Lermontov, Chesterton, Fleming, Naipaul, Rushdie, Orhan Pamuk, and Dickens, among others, as well as his laugh-out-loud self-mocking “makeover.” The range and quality of Hitchens’s essays transcend the particular occasions for which they were originally written, yielding “a bounty of famous scalps, thunder-blasted targets, and a few love letters from the notorious provocateur-in-chief’s erudite and scathing assessments of American culture” (Vanity Fair). Often prescient, always pugnacious, formidably learned, Hitchens was a polemicist for the ages. With this posthumous volume, he remains, “America’s foremost rhetorical pugilist!” (The Village Voice).

The study will consist of reports from different countries and will focus on the compensation of occupational diseases and accidents. Issues like discrimination, moral or sexual harassment and other damages claims of employees will be dealt with in the reports for some countries. Major aspects of the reports will be a description of different existing compensation schemes, interactions between Employers' Liability and Workers' Compensation, a comparison of both systems and their respective efficiency.

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In A House To Remember, she explains why.

Because of media information and the popularity of the Internet, many first time users and seniors are becoming more interested in computers. The demand for senior computer instruction is basically the result of people retiring before computer use in the workplace became common or retiring from jobs where computer use was not emphasized. A different approach is presented in this book revealing hidden programs and utilities that every first time user would want to know, and unlocking hidden codes that first time users can use to maintain and fix any and all problems that may come up with their computers using the MMC, CMD, Explorer Shell and other built-in utilities.

This latest edition is designed to help students master the math essentials found on all levels of the COMPASS, ASSET, and ACCUPLACER exams. These exams, given by colleges country-wide, are taken by students to place them into the appropriate college courses. This guide offers comprehensive review and practice for the high school math students need to know to succeed on their exams, including Pre-Algebra, Algebra, Geometry, and Trigonometry fundamentals.

THE EXPLOSIVE, APOCALYPTIC FIRST THRILLER BY THE AUTHOR OF Acts of Vanishing. The future of humankind rests in the hands of a disgraced military code-breaker and a journalist—his ex-wife. William Sandberg, once a well-respected military cryptologist, is a ruined man. His career is in shambles, his marriage is over, and he's succumbed to a deep depression. But William's talents haven't gone unnoticed. A nameless, top-secret organization abducts him and tasks him with a daunting mission: decode a message that will reveal the disastrous prophecies hidden in our DNA before it is too late. Meanwhile, William's ex-wife Christina sets out to find him. She connects with an eccentric group at a mysterious chateau in the Alps, where the secret organization is plotting the destruction of humankind—unless the ex-lovers can reunite and put a stop to the plan. A thrilling, globe-spanning novel about humanity on the verge of crisis, Chain of Events explodes and then reconfigures the ties that bind us to one another.

Introduces the art and technique of calligraphy; provides instructions for writing italic, Gothic, uncial, and Roman alphabets, punctuation, and decorative borders; and suggests projects. Reprint.

A great read for fans of PBS's Poldark and Downton Abbey—first in the saga of a man returning from battle to an estate in the pre-WWI English countryside. After serving his country in the Boer War, injured Lieutenant Paul Craddock returns to England to resume civilian life. But things have changed since he joined the Imperial Yeomanry three years ago. His father has died, leaving Paul as heir to a scrap metal business he has no intention of continuing. Instead, he purchases an auctioned-off thirteen-hundred-acre estate in a secluded corner of Devon. Neglected and overgrown, Shallowford becomes the symbol of all that Paul has lost—and a reminder of the gentle place his homeland once was. And here, on this sprawling stretch of land, he will be changed by his love for two women: fiercely independent Grace Lovell, and lovely, demure Claire Derwent. Set in the English countryside in the first part of the previous century—from the long “Edwardian afternoon” following the death of Queen Victoria, to the gathering storm of World War I—Long Summer Day is the story of a man, his family, and a people struggling to adapt to life in a new world. Long Summer Day is the first novel in R. F. Delderfield’s saga A Horseman Riding By, which continues with Post of Honour and The Green Gauntlet.

A stylishly smart collection of practical advice for the busy modern woman With information on entertaining, etiquette, housekeeping, basic home repair, decorating, sex, and beauty, this indispensable book has everything today's young woman should know-but may not! The Modern Girl's Guide to Life is a collection of all the helpful tips and secrets that get passed on from generation to generation, but many of us have somehow missed.
