Procedure: EXTERNAL 1. Go to the bucket and get yourself a pig heart. Rinse off the excess preservative with tap water and run water into the larger blood vessels to force any blood clots out of the heart chambers. Pat the heart dry and place it in your dissection tray. 2. It is important to know that the heart is usually covered in adipose tissue.

### Pig Heart Dissection - BIOLOGY JUNCTION

Based on the KS3 Year 8 Human Heart topic, this resource guides students through the dissection of a pig's heart. I have also created a worksheet to recap heart external and internal structure that is included. I did this lesson about mid-way through our topic on the heart and it really helped students to grasp the theoretical content.
