This course introduces students to plant transformation technologies and genetic engineering methodologies for the introduction of beneficial traits into economically important plants. It also introduces students to plant tissue culture techniques and the impact of this technology on preservation of plant species and plant tissue based production of proteins and secondary metabolites.

Traditional methods date back thousands of years, whereas biotechnology uses the tools of genetic engineering developed over the last few decades.

8.2 Biotechnology and Genetic Engineering – Environmental ...

For some years now, plant biotechnology, especially genetic engineering, has enabled us to modify the cycle of plant production, strengthening resistance to weedkillers and pests, improving yields and quality, adapting plants to unfavourable environments and creating new species.

Application of genetic engineering in crop production. Genetic engineering techniques are used only when all other techniques have been exhausted, i.e. when the trait to be introduced is not present in the germplasm of the crop; the trait is very difficult to improve by conventional breeding methods; and when it will take a very long time to introduce and/or improve such trait in the crop by conventional breeding methods (see Figure 2).

C. Genetic Modification of
Plants(GM Crops) The DNA of
plants used in agriculture
are modified using genetic
engineering techniques.

There are two primary
processes through which
plants are modified:

Cisgenic: Genes are
artificially transferred
between organisms that could
be conventionally bred i.e.
from a crossable or sexually
compatible plant.

Biotechnology is a broad area of biology, involving the use of living systems and organisms to develop or make products. Depending on the tools and applications, it often overlaps with related scientific fields. In the late 20th and early 21st centuries, biotechnology has expanded to include new and diverse sciences, such as genomics, recombinant gene techniques, applied immunology, and ...
