quantitative and qualitative approaches and highlights the most current innovations in theory and practice.

Going beyond the traditional constraints of “price theory” and “price policy,” the authors coined the term “price management” to represent a holistic approach to pricing strategy and tactical implementation. They remind us that the Ancient Romans used one word, *pretium*, to mean both price and value. This is the fundamental philosophy that drives successful price management where producer and customer meet. Featuring dozens of examples and case studies drawn from their

extensive research, consulting, and teaching around the world, Simon and Fassnacht cover all aspects of pricing following the price management process with its four phases: strategy, analysis, decision, and implementation. Thereby, the authors take into account the nuances across industry sectors, including consumer goods, industrial products, services, and trade/distribution. In particular, they address the implications of technological advancements, such as the Internet and new measurement and sensor technologies that have led

to a wealth of price management innovations, such as flat rates, freemium, pay-per-use, or pay-what-you-want. They also address the emergence of new price metrics, Big Data applications, two-sided price systems, negative prices, and the sharing economy, as well as emerging payment systems such as bitcoin. The result is a “bible” for leaders who recognize that price is not only a means to drive profit in the short term, but a tool to generate sustained growth in shareholder value over the longer term, and a primer for researchers, instructors, and students

This book, which was first published in 1952, first began as a history of San Angelo and the adjacent region drained by the Conchos rivers. It grew, in writing, into a history of West Texas. It embodies author J. Evetts Haley's unequalled knowledge of the country from the Rio Grande to the Canadian, from San Antonio and Austin to the border of New Mexico. It could have been written only by a man familiar by personal acquaintance with the location of every water hole and spring, the exploration of every trail
