How to Tune Your Rig | North Sails. Without a properly tuned rig, you won't be able to control your mast's behavior over the full range of conditions. Fortunately, rig tuning is a straightforward step by step process for both masthead and fractional rigs. The goals in rig tuning are the following: (1) Eliminate side bend and lean, (2) Set mast rake for proper helm balance, (3) Set pre-bend to match the mainsail design, and (4) Control mast bend and headstay sag.

This book does an outstanding job of condensing the rather large topic of sail trim (and rig tuning) into one concise, illustrated book. It covers foresails, the mainsail, and spinnakers, and always describes the whys, not just the what-to-dos. I highly recommend it to sailors that are from intermediate to doesn't-quite-know-it-all.

Tuning Your Rig : RadioSailingShop

Sail Rig Tune Our sail tune service is available outside our peak spring season. We will first carry out some dock tuning before heading out for a test sail to check that the mast and sails are working well together. This allows us to fine tune your rig to help achieve the best sail shape and optimise boat speed.
