Key Methods in Second Language Acquisition Research

Abstract. Since its inception in the 1960s, the field of second language acquisition (SLA) has sought to document and explore how children and adults acquire a nonnative language.

Researchers have investigated the linguistic, cognitive, social, contextual, psychological, and neurobiological characteristics of second language (L2) learning, processing, and use.

Studies in Second Language Acquisition | Cambridge Core

Research in this area (called “second language acquisition” in academia) suggests that there are three key elements to learning a new language. The first is comprehensible input, which is a fancy way of saying being exposed to (hearing or reading) something in the new language and learning to understand it.
