Heat Conversion Systems develops the underlying concepts of advanced Rankine-based absorption and compression cycles and introduces the Building Block Approach as a general concept. The Building Block Approach identifies all cycle configurations for a given application to ensure that system designers have available all important alternatives. The book features numerous examples of advanced cycles and includes single- and multi-stage absorption heat pumps and heat transformers and combined systems. The book also discusses single- and multi-stage vapor compression systems with multiple solution circuits, multiple compressors, and cascades. Aspects of working fluid selection and their influence on cycle options, performance evaluation, and estimating procedures for the Coefficient of Performance (COP) are addressed. Cycle analysis based on the Second Laws of Thermodynamics is examined. Heat Conversion Systems will be an important source for engineers in air-conditioning, heat pumping, refrigeration, and waste heat utilization. It can be used as text in courses on thermodynamics, efficient use of energy, and environmental protection.

Written by Peter Moon and Radu Cinamar, a highly placed Romanian intelligence operative, this book heralds the most remarkable archaeological find in the annals of Mankind. Unbeknownst to most, there is an ancient sphinx located in the Bucegi Mountains of Romania. In 2003, the Pentagon discovered, through the use of satellite technology, an anomaly beneath this ancient sphinx. Through the highest levels of Freemasonry, the Pentagon was able to secure an alliance with the most secret department of the Romanian Intelligence Service which is known as Department Zero. Together, the Romanians and the Americans utilised the Pentagon's secret technology to penetrate a hidden chamber beneath the sphinx which was otherwise inaccessible to humans. What was discovered eventually was a holographic Hall of Records left by an advanced civilisation near three mysterious tunnels leading into the Inner Earth. The book chronicles the discovery of these modern day artefacts which represent the dawn of a new era for Mankind. Peter Moon is brought into the fold through his friend, Dr David Anderson, the mysterious scientist who founded the Time Travel Research Center on Long Island and also maintains a similar facility in Romania. Recognising that such satellite technology would had to have utilised Dr Anderson's proprietary space-time technology for maintaining satellites in orbit, Peter Moon pursues these matters further and accepts Dr Anderson's invitation to Romania where he visits the Romanian Sphinx and learns of a mysterious association between the mysterious time travel scientist and Radu Cinamar.

Radu Cinamar is recruited for Deparment Zero and explores the tunnel from the Bucegi Sphinx chamber to a similar chamber beneath Giza where a time travel device is found.

Joanne is beautiful and popular but uses her friends and her boyfriends. Her new boyfriend Dex falls in love with her. When he dies, Joanne realizes that she has gone too far, for now

Dex has come back from the dead...for her!

In 2003, when a mysterious ancient chamber was unearthed beneath the Romanian Sphinx in the Bucegi Mountains, it became a state secret of the highest level for Romania and their new partner, the United States, whose advanced technology enabled the discovery to take place. The primary custodial agency of this remarkable chamber full of holographic technology is Department Zero, a secret service unit that answers only to the Romanian president. Ever since, there has been a continuous and persistent effort by certain Romanian and American factions to undermine the authority of Department Zero in order to gain access to and control this technology. The Secret Parchment – Five Tibetan Initiation Techniques tells the story of the detailed political intrigues behind this remarkable find and also how these matters have been subject to intervention by superior spiritual forces, one of which concerns the arranged discovery of an ancient Tibetan manuscript which is revealed and explained in this book. After the ancient manuscript is translated, a mysterious antenna-like structure reveals itself as a result of melting ice near a secret American base in Antarctica. Acting as some sort of cosmic buoy, it has an energy signature connecting both to Jupiter's moon, Europa, and an area of Transylvania where the remains of an ancient civilization were uncovered in 1990 amidst vast tunnels of solid gold. Long ago classified as the top state secret of Romania, this location becomes the center of intrigue in and around Department Zero. Although not actually penetrating the underground area itself, Peter Moon visits the general area and determines that this ancient civilization is still very much alive and active.

#1 New York Times Bestseller – Significant... The book is both instructive and surprisingly moving. – The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business – and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as – an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency. – It is these principles, and not anything special about Dalio – who grew up an ordinary kid in a middle-class Long Island neighborhood – that he believes are the reason behind his success. In Principles, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of – radical truth – and – radical transparency, – include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating – baseball cards – for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they're seeking to achieve. Here, from a man who has been called both – the Steve Jobs of investing – and – the philosopher king of the financial universe – (CIO magazine), is a rare opportunity to gain proven advice unlike anything you'll find in the conventional business press.

For the first time, Preston reveals his employment at Brookhaven Labs and how his connections in the music industry were used for mind control and manipulation of the masses. Ultimately, Preston's real-life adventures lead to time travel, his own role in the future, and the efforts of his adversaries to arrest him and put him permanently out of commission. This includes the bone chilling story of John Ford, Preston's colleague, who is locked up without a trial for his own efforts to expose the truth. In a remarkable twist of fate, mysterious forces rescue Preston and begin a documented investigation and eventual conviction of the most politically powerful man on Long Island. This book reveals more layers of mystery in mankind's epic quest to understand the paradox of time and the imprisonment of consciousness.

For millennia the seven stars known as the Pleiades have twinkled in the night sky, inspired countless legends and dared Mankind to discover their secrets. Encounter in the Pleiades is the story of a man who was taken to the Pleiades and given a scientific education far beyond the horizons of anything taught in universities. For the first time, the personal history of Preston Nichols is revealed along with an avalanche of amazing information the world has not yet heard. A new look at Einstein gives insights into the history of physics and how the speed of light can be surpassed through the principles of reality engineering. New concepts in science are offered with technical but simple descriptions even the layman can understand. These include the creation of alternate realities through the use of twisters and spinners; mind control aspects of the Star Wars defence system; implants; alien abductions and much more. Peter Moon adds further intrigue to the mix by divulging his part in a bizarre project which led him to Preston Nichols and the consequent release of information. His account of the role of the Pleiades in ancient mythology sheds new light on the current predicament of Mankind and offers a path of hope for the future.
