New Precast Concrete Member modeling and design via Tekla Tedds 2020 Integration In an exciting development, integration with Tekla Tedds has been thoroughly enhanced to allow the efficient design of precast concrete beams and columns using the new in Tedds 2020 precast concrete member design calculations. See the feature in action in this video.

New Precast Concrete Member modeling and design via Tekla ...
This video gives you an overview of how modeling and detailing precast concrete works with Tekla Structures. You can work with any structure regardless of ma...

Precast concrete: 3D modeling and detailing with Tekla ...
Students will be taught how Tekla Structures uses automated routines to number all the parts in the model and lastly, will be guided through the process and tools used to generate erection drawings and shop tickets. Attendees will be sent a short exercise prior to class which will show them how to build a basic precast structure.

Precast Basic Training | Tekla
With Tekla you can work with any structure regardless of material, size or complexity. Because the software integrates design and detailing with fabrication and project management, you can streamline the entire precast workflow from bidding to delivery. Tekla allows accurate estimation and thus winning more bids and increasing profits. You can detail any precast concrete structure, improve ...
