The Ocean of Life: The Fate of Man and the Sea eBook ...

Marine life, or sea life or ocean life, is the plants, animals and other organisms that live in the salt water of the sea or ocean, or the brackish water of coastal estuaries. At a fundamental level, marine life affects the nature of the planet. Marine organisms, mostly microorganisms, produce oxygen and sequester carbon. Shorelines are in part shaped and protected by marine life, and some marine organisms even help create new land.

A Life on the Ocean Wave - YouTube

As the world ocean is the principal component of Earth's hydrosphere, it is integral to life, forms part of the carbon cycle, and influences climate and weather patterns. The World Ocean is the habitat of 230,000 known species , but because much of it is unexplored, the number of species that exist in the ocean is much larger, possibly over two million. [10]

Ocean - Wikipedia

Poem: The ocean of life. February 22, 2018. Movement of the sea. No landscape in sight. Greater than us all. The unknown is so bright. Light as a feather. We are following the waves. Carrying us to our destiny.
