Conceived by Albert Einstein, it is an elegant and coherent vision of gravity, space and time. It is, says Rovelli, 'the most beautiful theory produced by physics' and 'comparable to Mozart's Requiem, Shakespeare's King Lear or Michelangelo's ceiling in the Sistine Chapel'. General relativity shows that the Earth moves around the Sun not because a mysterious invisible force pulls it, he explains, but because 'space bends and curves under the weight of matter'.

A theory of everything, final theory, ultimate theory, or master theory is a hypothetical single, all-encompassing, coherent theoretical framework of physics that fully explains and links together all physical aspects of the universe. Finding a TOE is one of the major unsolved problems in physics. String theory and M-theory have been proposed as theories of everything. Over the past few centuries, two theoretical frameworks have been developed that, together, most closely resemble a TOE. These t
