Free Four Temperament Test with 98% accuracy | 4 Temperaments

The four temperament theory is a proto-psychological theory which suggests that there are four fundamental personality types: sanguine, choleric, melancholic, and phlegmatic. Most formulations include the possibility of mixtures among the types where an individual's personality types overlap and they share two or more temperaments. Greek physician Hippocrates described the four temperaments as part of the ancient medical concept of humourism, that four bodily fluids affect human personality trait

Four temperaments—Wikipedia

As already mentioned above, four basic temperament types consist of sanguine, choleric, phlegmatic, and melancholic where the first two belong to extroverts while the last two are considered introverts. Most of us are a blend of two temperaments but one dominates the other anyway, especially if you have an 'extrovert-introvert' combination.

How Temperament Type Can Influence Your Career + Cleverism

In his works, Keirsey used the names suggested by Plato: Artisan (iconic), Guardian (pistic), Idealist (noetic), and Rational (dianoetic). Keirsey divided the four temperaments into two categories (roles), each with two types (role variants). The resulting 16 types correlate with the 16 personality types described by Briggs and Myers (MBTI).

16 Personality Types (Myers-Briggs and Keirsey)—Infographic

The Sanguine temperament has three combinations: Sanguine-Choleric, Sanguine-Phlegmatic, and Sanguine-Melancholy. The traits of the primary temperament, Sanguine, may be altered or modified in some significant way due to the influence of the secondary temperament. Remember, there are at least three levels of intensity of a temperament: classic, moderate, and mild.
