Never in human history has there been an event more horrifying than the Holocaust—the human loss inconceivable, the aftershocks felt for generations. But in the midst of the misery was forged a strength of spirit and humanity that shows in the faces and stories of survivors. Captured here with clarity and truth are fifty images of survival, portraits of the men and women who actually lived through the brutality. The tales of survival vary: the misery of day-to-day existence in the camps; the luxury and guilt of passing as a non-Jew; the ever-mounting dread of having a hiding place raided by the SS; the chaos of families fleeing, broken and

scattered. Punctuating the narratives throughout the book are impassioned essays by Abe Foxman, Yaffa Eliach, Anne Roiphe, Rabbi Arthur Hertzberg, Eva Fogelman, and others. An introduction by National Book Award-winner Robert Jay Lifton opens the text. Taken together, this powerful collection of words and images forms a moving testimony to human dignity and a record of history that must never be forgotten.

One of Time's 100 best English-language novels □ A mind-altering romp through a future America so bizarre, so outrageous, you'll recognize it immediately Only once in a great while does a writer come along who defies comparison—a writer so original he redefines the way we look at the world. Neal Stephenson is such a writer and Snow Crash is such a novel, weaving virtual reality, Sumerian myth, and just about everything in between with a cool, hip cybersensibility to bring us the gigathriller of the information age. In reality, Hiro Protagonist delivers pizza for Uncle Enzo's CosoNostra Pizza Inc., but in the Metaverse he's a warrior prince. Plunging headlong into the enigma of a new computer virus that's striking down hackers everywhere, he races along the neon-lit streets on a search-and-destroy mission for the shadowy virtual villain threatening to bring about infocalypse. Praise for Snow Crash "[Snow Crash is] a cross between Neuromancer and Thomas Pynchon's Vineland. This is no mere hyperbole."—The San Francisco Bay Guardian "Fast-forward free-style mall mythology for the twenty-first century."—William Gibson "Brilliantly realized . . . David Poole's innovative LINEAR ALGEBRA: A MODERN INTRODUCTION, 4e emphasizes a vectors approach and better prepares students to make the transition from computational to theoretical mathematics. Balancing theory and applications, the book is written in a conversational style and combines a traditional presentation with a focus on student-centered learning. Theoretical, computational, and applied topics are presented in a flexible yet integrated way. Stressing geometric understanding before computational techniques, vectors and vector geometry are introduced early to help students visualize concepts and develop mathematical maturity for abstract thinking. Additionally, the book includes ample applications drawn from a variety of disciplines, which reinforce the fact that linear algebra is a valuable tool for modeling real-life problems. (TAA)! Operating Systems: Internals and Design Principles is a comprehensive and unified introduction to operating systems. By using several innovative tools, Stallings makes it possible to understand critical core concepts that can be fundamentally challenging. The new edition includes the implementation of web based animations to aid visual learners. At key points in the book, students are directed to view an animation and then are provided with assignments to alter the animation input and analyze the results. The concepts are then enhanced and supported by end-of-chapter case studies of UNIX, Linux and Windows Vista. These provide students with a solid understanding of the key mechanisms of modern operating systems and the types of design tradeoffs and decisions involved in OS design. Because they are embedded into the text as end of chapter material, students are able to apply them right at the point of discussion. This approach is equally useful as a basic reference and as an up-to-date survey of the state of the art.
