written about the dark cloak of grief, the deep yearning, how devastating heartache feels. But until now, we have had little scientific perspective on this universal experience. In *The Grieving Brain*, neuroscientist and psychologist Mary-Frances O'Connor, PhD, gives us a fascinating new window into one of the hallmark experiences of being human. O'Connor has devoted decades to researching the effects of grief on the brain, and in this book, she makes cutting-edge neuroscience accessible through her contagious enthusiasm, and guides us through how we encode love and grief. With love, our

Based on O'Connor's own trailblazing neuroimaging work, research in the field, and her real-life stories, *The Grieving Brain* does what the best popular science books do, combining storytelling, accessible science, and practical knowledge that will help us better understand what happens when we grieve and how to navigate loss with more ease and grace.
